Title Description Comments:

Telephone conversation with consultant - I (DFS) spoke with Ally Colavita at Advanced GeoEnviromental. I said I reviewed the closure report with the fate and transport model. I said it needs some adjustments: they need to resolve the units used in the text and on the graphs; they are different. I said that graphs, data readout, and text of the fate and transport RISC model need to correspond so the dates the estimated plume reaches a point downgradient and the max concentration at a projected time are similar/match. Also, to do the RISC model for different times using MW-14C data as it changes, and to run earlier data runs as the plume detected in 2005 most likely represents a plume that has already migrated some distance past MW-14c; they may want to check the earliest data and migration data from other wells. Ally said they would check these items, then send an addendum to the closure report.

Email with consultant - 14 December 2010 6:00 am To: Ally Colavita From: David Stavarek re: Ricky's Chevron, 1015 Jefferson Blvd., West Sacramento, Yolo Co. Ally, I reviewed the data for this site and have the following schedule: MW-2A and MW-14C: quarterly sampling to establish the trends for these wells because MtBE has been up into the three hundreds this year. MW-4A, MW-5B, MW-12B, MW-16E: semi-annual first and third quarters. MW-11B semi-annual second and fourth quarters (recently there have been larger changes during the fourth quarter) All other wells can be sampled annually during the second quarter or more frequently if there is a need to monitor the migration of the MtBE plume. please contact me if you have any questions. David. David Stavarek, P.G. Engineering Geologist CVRWQCB R5S, UST Unit II 11020 Sun Center Drive, No. 200 Rancho Cordova, 95670 (916) 464-4673 off. (916) 464-4704 fax jpinnow@yolocounty.org >>> Alison Colavita 12/13/2010 10:37 AM >>> Hi David-- Re: Ricky's Beacon (45 15th Street, West Sacramento) and Ricky's Chevron (1015 Jefferson Blvd, West Sacramento) ground water monitoring schedule Both sites have an upcoming quarterly ground water monitoring event (4th Quarter). I was hoping to switch both sites to a semi-annual monitoring schedule during the 1st and 3rd quarters of the year with the Annual Event during the first quarter. For Ricky's Beacon AGE proposes to sample wells MW-4 and MW-10 semi-annually (1st and 3rd Qtrs) and the remaining wells annually (1st Qtr). For Ricky's Chevron AGE proposes to sample wells MW-2A, MW-4A, MW-5B, MW-12B, MW-13D, MW-14C/D, MW-15C/D, and MW-16E semi-annually (1st and 3rd Qtrs) and the remaining wells annually (1st Qtr). If you have any questions or concerns, please do not hesitate to contact us. Thank you for your time. Ally Colavita Project Scientist Advanced GeoEnvironmental, Inc. - Email correspondence between William Little and Karen Calleja at Advanced GeoEnvironmental (AGE) and DFS, from 7/22/2008 through 7/28/2008. AGE sent email with lab report for new wells installed at site, deep well MW-14D has 180 ug/L of MtBE. I respond that they should wait until they have collected several rounds of sample data from MW-14D to determine whether MtBE is from deep contamination of due to cross contamination. I suggest that they overpurge the well to remove possible cross contamination. AGE indicates they will defer a deeper well (MW-16E) until they can determine whether cross contamination of MW-14D has occurred.

Highlights: One of the early projects slated for the Bridge District is a 70-unit mixed-use affordable housing development to be constructed by non-profit builder BRIDGE Housing. The City will be participating as a gap financing lender in this project. This Phase I was completed in order to satisfy a requirement for the developer to pursue project financing from the State of California's Multifamily Housing Program. Former Use: The property was formerly occupied by warehouses that were demolished several years ago.

Site History:

FROM US CORPS GIS DATA BASE - Property Description - The 27.8-acre site is located approximately .25 mile northwest of the City of Sacramento in West Sacramento, Yolo County, CA. This property was surplused 31 July 1947 and the lease was cancelled effective 31 October 1947. Copies of the lease and lease cancellation are not available, so any restoration provisions are unknown. Currently the site is solely industrial use and all open spaces are now developed.

Property History - In 1942 the Army leased 27.8 acres from the Sacramento Northern Railway. The area was used by the U.S. Army Corps of Engineers, the former Pacific Division, as a closed storage area for military supplies. The property was surplused 31 July 1947 and the lease was cancelled effective 31 October 1947. The site was surplused to a private owner. Currently, there are no potential hazards identified at this site, further investigation is needed.

HALOGENATED SOLVENTS

Site History:

Van Waters and Rogers, Inc is a former chemical distribution facility that operated from 1960 to July of 1999. The company historically stored and/or handled PCE, acetic acid, acetone, Texanol, diesel, 1,1,1-TCA, and propylene glycol on the site.
Cleanup of groundwater and soil was required due to leaking underground storage tanks and chemical spillage.

Highlights: This property is being acquired by the City's Redevelopment Agency to complete property assembly for a 70-unit high-density mixed-use affordable housing development in the Bridge District (Triangle Specific Plan area). The Bridge District is planned for the total build-out of over 4,000 housing units and up to 12 million square feet of residential, office, retail, hotel, entertainment, and park space. Former Use: This property was originally developed as a roadway within the City's former industrial area known as the Triangle (now being redeveloped into a high-density, urban infill, mixed-use development area). The roadway remained on the site until the Pioneer Bridge over the Sacramento River (U.S. Highway 50) was constructed in the mid-1960s. The roadway was abandoned in the late 1960s during the re-alignment of South River Road. Since that time the site has remained vacant, although it

was under the ownership of the railroad since as early as 1919.

Comments:

INSPECTION(STATE) SURVEILLANCE & ENFORCEMENT INSPECTED SITE IN RESPONSE TO COMPLAINT OF ILLEGAL DISPOSAL. SAMPLES WERE COLLECTED. PHOSTOXIN PREPACS WERE COLLECTED. SAMPLE RESULTS ALUMINUM PHOSPHATE DETECTED IN SOIL AT 844 AND 1;012 PPM. PREPACES CONTAINED 3-5 PERCENT ALUMINUM PHOSPHATE RESIDUE. PHOSTOXIN DISPOSAL AREA IS/WAS LOCATED AT THE WEST SIDE OF THE EQUIPMENT STORAGE BUILDING. VIOLATION DETECTED DHS ISSUES A FENCE & POST ORDER. SITE SCREENING DONE SCREENING DONE; RECOMMEND PRELIMINARY ASSESSMENT. PRELIM ASSESS DONE PRELIMINARY ENDANGERMENT ASSESSMENT REPORT SUBMITTED. SOIL REMOVAL CONDUCTED 4/24/90. SAMPLE RESULTS INDICATE ALL POINTS BELOW DETECTION LIMIT AT .1 PPB. RISK ASSESSMENT CONCLUDES DETECTION LIMIT IS BELOW HEALTH PROTECTIVE LEVEL. SITE SCREENING DONE RECOMMEND NO FURTHER ACTION REQUIRED AT PHOSTOXIN BURIAL SITE.

Calenviroscreen 3 Score:	81-85%
Calenviroscreen 4 Score:	80-85%
Site History:	

The Site is currently a Raley's grocery store and a key sales kiosk. Before the 1960s, the Site contained a gasoline station on the northwest corner of the property, an auto repair facility on the west side of the property, and a truck repair facility on the southwest side of the property. Brusca Associates, Inc. (Brusca) completed a Phase I report in September 2017, a Phase II investigation in March 2019, and an Additional Site Investigation in July 2020. Yolo County Environmental Health Division (YCEHD) opened a UST case in March 2019 for the petroleum release. Following a ground penetrating radar survey in February 2019, Brusca removed a 750-gallon petroleum UST from the south side of the Site in July 2020. YCEHD did not require further work associated with that UST. Soil, groundwater, and soil gas sample data from the Site were below criteria of the Low-Threat Closure Policy. Remediation through biodegradation and natural attenuation have reduced petroleum concentrations in the soil and groundwater. Brusca concludes that the residual petroleum in soil and groundwater is unlikely to pose a risk to current and future receptors. Central Valley Water Board staff concurs with Brusca that closure of the UST case under the Low-Threat Closure Policy is appropriate. Central Valley Water Board staff recommends issuing a no further action letter for closure of this UST case.

Site History:

This Site historically contained a gasoline service station on the northwest corner of the Site, an auto repair facility on the west side of the Site, and a truck repair facility on the southwest side of the Site. Currently, a Raley's grocery store encompasses the east side of the Site and the associated parking lot encompasses the west side of the Site. Brusca Associates, Inc. (Brusca) completed a Phase I report in September 2017 and investigations in March 2019, July 2020, and January 2021. Brusca analyzed soil, groundwater, and soil gas samples for volatile organic compounds (VOCs). Samples contained petroleum hydrocarbons and chlorinated VOCs (CVOCs). In March 2019, Yolo County Environmental Health Division opened an underground storage tank (UST) case for a petroleum release associated with the former gasoline station. In March 2021, the Central Valley Water Board opened a Site Cleanup case for the CVOCs. The suspected source of CVOCs is a shallow surface release near the center of the parking lot from historic auto repair activities. Based on Site data, Brusca concluded that soil, groundwater, and soil gas impacts are defined and contained to the Site. To protect human health from the CVOCs beneath the parking lot, the Site's Responsible Party recorded a land use covenant to the Site property on 12 January 2022 restricting future development of the parking lot area. Because groundwater impacts are localized beneath the parking lot and human health is protected, Central Valley Water Board staff recommended closing the Site Cleanup Program case. This case was closed as of 24 August 2022. Please see associated UST case (T0000012812) for additional Site documents.

Potential COC:	TETRACHLOROETHYLENE (PCE), TRICHLOROETHYLENE (TCE)
Potential Media of Concern:	OTHER GROUNDWATER (USES OTHER THAN DRINKING WATER), SOIL, SOIL VAPOR
Groundwater Monitoring Freq:	
DWR GW Sub Basin:	Sacramento Valley - Yolo (5-021.67)
CalWater Watershed Name:	Sacramento Delta (510.00)
Post Closure Site Management:	
Future Land Use:	
Cleanup Oversight Agencies:	CENTRAL VALLEY RWQCB (REGION 5S) (LEAD) CASEWORKER: MICHAEL DESMET
Cleanup History Link:	https://geotracker.waterboards.ca.gov/profile_report_include?

global_id=T10000016948&tabname=regulatoryhistory

Site History:

This Site historically contained a gasoline service station on the northwest corner of the Site, an auto repair facility on the west side of the Site, and a truck repair facility on the southwest side of the Site. Currently, a Raley's grocery store encompasses the east side of the Site and the associated parking lot encompasses the west side of the Site. Brusca Associates, Inc. (Brusca) completed a Phase I report in September 2017 and investigations in March 2019, July 2020, and January 2021. Brusca analyzed soil, groundwater, and soil gas samples for volatile organic compounds (VOCs). Samples contained petroleum hydrocarbons and chlorinated VOCs (CVOCs). In March 2019, Yolo County Environmental Health Division opened an underground storage tank (UST) case for a petroleum release associated with the former gasoline station. In March 2021, the Central Valley Water Board opened a Site Cleanup case for the CVOCs.

The suspected source of CVOCs is a shallow surface release near the center of the parking lot from historic auto repair activities. Based on Site data, Brusca concluded that soil, groundwater, and soil gas impacts are defined and contained to the Site. To protect human health from the CVOCs beneath the parking lot, the Site's Responsible Party recorded a land use covenant to the Site property on 12 January 2022 restricting future development of the parking lot area. Because groundwater impacts are localized beneath the parking lot and human health is protected, Central Valley Water Board staff recommended closing the Site Cleanup Program case. This case was closed as of 24 August 2022.

Please see associated UST case (T0000012812) for additional Site documents.

Phone Calls: Emily Cushman (EMC), CVRWQCB left voicemail messages for John Dickerson, Crown Enterprises, and John Hochstein, Stephens Environmental, stating that the 2nd Quarter 2015 monitoring report was not received and an Administrative Civil Liability (ACL) will be drafted for management's approval. Would like to see shallow soil sampling completed so that the site may be assessed for closure. Follow up Phone Call: EMC recieved voicemail and called back John Hochstein, notified that ACL will be drafted and that the 3rd Quarter 2015 monitoring report is due October 15, 2015. John is working with Clearwater to get them under retainer to complete the requested work at the site.

Action Date: 2/4/2015
Received Issue Date: 2/4/2015
Doc Link:
Title Description Comments:

Phone Call: EMC called Crown's general line and dialed X 2772 for John Pace, an alternate contact within Crown according to John Dickerson's outgoing voicemail message. Chris with "Facilities Maintenance" answered at X 2772 and connected EMC to Craig Stamper, a "Project Manager" who works with John Dickerson. EMC explained to Craig that Crown was liable to up to $2.4 Million for non-reporting under their Jan 2013 order- we have only received two reports since the order was issued- the fines are $1,000 per day per report, and only a few data gaps needed to be filled before the site would be considered for closure, these things were outlined in an 11/5/2014 letter, shallow soil samples, SRS on the ground recon, and NFAR request report. EMC directed Craig to the GeoTracker page for the site and walked him through finding the 11/5/2014 letter and EMC's contact info. EMC stated that she would be preparing recommendations for administrative civil liabilities for the CVRWQCB's executive officer. Craig stated that he would make some phone calls to see what could be done about getting the work done.

Received Issue Date: 2/2/2015
Doc Link:
Title Description Comments:

Phone Call: EMC called John Hochstein of Stephens Environmental to discuss status of site. John said Clearwater would be out sampling at the site that week. EMC explained that there were only a few data gaps that need to be filled before the site would be considered for closure, these things are outlined in the 11/5/2014 letter to Crown: shallow soil samples, on the ground recon to verify there are no sensitive receptors at the adjacent properties, and documentation in a NFAR request report. EMC explained that Crown is liable for up to $2.4 Million for non-reporting under their 13267 Order and that she had been directed by her management to prepare a recommendation for administrative civil liabilities for the CVRWQCB's executive officer.

Doc Link:
Title Description Comments:

Phone Call: John Hochstein of Stephens Environmental- EMC called to find out why the 4th Q 2014 monitoring report was late. John said he got busy with the holidays and the end of the year and it slipped his mind. EMC explained Crown is under an Order that requires them to monitor and report and failure to submit the required reports makes Crown liable for substantial fines. EMC referred John to CVRWQCB's 11/5/2014 letter which outlines the information needed before the site can be considered for closure. John said he would get in touch with their consultant, Clearwater Group, and see what could be done.

Title Description Comments:

Phone call to Clearwater with email follow up regarding 3rd Q 2014 report. EMC asked for clarification about why samples were turbid and why the lab was centrifuging and decanting the samples before analysis. Olivia Jacobs explained that the soil at the site is very silty and it is possible that the gravel packs in the wells were not constructed properly. Olivia forwarded an email from Dave Stavarek (5/21/2013) okaying the lab to centrifuge the samples if the containers are closed and not heated and asking that the process is documented to assure that the VOCs are not striped from the samples. No such statement was found in the 2ndQ2013 or the 3rdQ2014 reports. EMC will be issuing a formal letter to Crown regarding the 3rdQ2014 request to stop QMR, concurring with the locations proposed for soil sampling, centrifuging, and the completion of the sensitive receptor survey.

Title Description Comments:

Phone Call: Emily Cushman (EMC) called John Hochstein of Stephens Environmental/Crown Enterprises. EMC stated that 1/28/2013 13267 Order (Order) was an attachment to the 3/11/2014 NOV (NOV) but John was not able to find the Order so EMC emailed a link to the Order to John during the phone call. EMC stated that the only thing required of Crown by the Order was quarterly monitoring and reporting (QMR) and that we have only received one QMR (2nd Q 2013 received on 3/26/2014) since the issuance of the Order. The NOV stated that Crown would be considered up to date with the Order with the submittal of the overdue 2nd Q 2013 report but EMC reminded John that, per the Order, continued quarterly monitoring and reporting was required and we haven't received any current reports following the issuance of the 3/11/2014 NOV. EMC stated that we are preparing a second NOV and we expect a 3rd Q 2014 QMR, that the third quarter ends at the end of September, the report is due October 15th, and that these requirements are stated in the Order. EMC stated that if we don't receive the 3rd Q 2014 QMR by the due date we will be recommending Crown to our board for consideration for administrative civil liabilities.

Title: PHONE CALL TO CLEARWATER WITH EMAIL FOLLOW UP REGARDING 3RD Q 2014 REPORT. EMC ASKED FOR CLARIFICATION ABOUT WHY SAMPLES WERE TURBID AND WHY THE LAB WAS CENTRIFUGING AND DECANTING THE SAMPLES BEFORE ANALYSIS. OLIVIA JACOBS EXPLAINED THAT THE SOIL AT THE SITE IS VERY SILTY AND IT IS POSSIBLE THAT THE GRAVEL PACKS IN THE WELLS WERE NOT

CONSTRUCTED PROPERLY. OLIVIA FORWARDED AN EMAIL FROM DAVE STAVAREK (5/21/2013) OKAYING THE LAB TO CENTRIFUGE THE SAMPLES IF THE CONTAINERS ARE CLOSED AND NOT HEATED AND ASKING THAT THE PROCESS IS DOCUMENTED TO ASSURE THAT THE VOCS ARE NOT STRIPED FROM THE SAMPLES. NO SUCH STATEMENT WAS FOUND IN THE 2NDQ2013 OR THE 3RDQ2014 REPORTS. EMC WILL BE ISSUING A FORMAL LETTER TO CROWN REGARDING THE 3RDQ2014 REQUEST TO STOP QMR, CONCURRING WITH THE LOCATIONS PROPOSED FOR SOIL SAMPLING, CENTRIFUGING, AND THE COMPLETION OF THE SENSITIVE RECEPTOR SURVEY.

Site History:

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Sites from GeoTracker Search - Cleanup Action Report (as of May 25, 2023)

Action Type: EXCAVATION
Begin Date: 3/15/1988
End Date: 3/16/1988
Phase: Soil
Contaminant Mass Removed:
Description: In March 1988 380 cubic yards of diesel contaminated soil was excavated during UST removal and disposed at a facility ion Kettleman, California.

Action Type: MONITORED NATURAL ATTENUATION
Begin Date: 3/19/1987
End Date:
Phase: Water
Contaminant Mass Removed:
Description: Monitored natural attenuation begins with the installation of monitoring wells in March 1987, however, source material was not removed until March 1988, therefore, we assume that attenuation effectiveness improves after 1988.

Action Date: 5/27/2010
Received Issue Date: 5/10/2010
Doc Link:
Title Description Comments:

Telephone conversation with consultant - 10 May - 27 May 2010. I (DFS) spoke with Paul Dotson at TEC regarding review of their April 2010 report. I indicated that they need to prepare a closure report according to Appendix A that address water quality and human health. I said I am sending a letter requesting report and indicated they should review all the data, may be able to use a 1988 soil vapor survey to demonstrate that there is no potential risk to human health due to hydrocarbon vapors. If existing data is not sufficient then need to propose additional work to obtain data for closure. Also need to show that relatively high concentrations recently detected in grab samples is due to sediment in groundwater samples to resolve issue of higher concentrations in grab groundwater samples.

Email with consultant - To: Paul Dotson From: David Stavarek re: Former Milne Trucking, 830 E Street, West Sacramento, Yolo Co. Paul, I concur with your request to sample MW-3 during the late first quarter of 2010 instead of the second quarter as previously scheduled. Please resume the previous schedule for MW-3 during the third quarter of 2010, and contact me if there are any other changes to this schedule. David. David Stavarek, P.G. Engineering Geologist CVRWQCB R5S, UST Unit II 11020 Sun Center Drive, No. 200 Rancho Cordova, 95670 (916) 464-4673 off. (916) 464-4704 fax dstavarek@waterboards.ca.gov >>> "Paul Dotson"
3/15/2010 3:17 PM >>> Mr. Stavarek, This letter is to inform you that Technology, Engineering and Construction, Inc (TEC) will be completing the scope of work requested in your letter dated November 17, 2008 for the Former Milne Truck Lines project located at 830 E Street in West Sacramento on March 22 and 23, 2010. The scope of work will include advancing five CPT borings to collect groundwater samples. In addition, groundwater monitoring will also be completed. Based on the monitoring schedule provided on the GeoTracker website, wells MW-1 and MW-2 are to be monitored quarterly and MW-3 semi-annually during the 2nd and 4th quarters; wells MW-4, MW-8, MW-9 and MW-10 are not sampled. TEC is requesting that the monitoring schedule for MW-3 be revised slightly (late first quarter) so that the monitoring event can be completed concurrently with the CPT investigation. Thank you, Paul B. Dotson, PG Senior Project Geologist TEC Environmental INTELLIGENT SOLUTIONS TO ENVIRONMENTAL CHALLENGES 262 Michelle Court, South San Francisco, CA 94080 Tel: (650) 616-1208, Cel: (650) 222-0890, Fax: (650) 616-1244 dstavarek@waterboards.ca.gov

Title Description Comments:

DFS of Email with Marc Mullaney and Adam Dickenson at TEC Accutite. Marc emailed requesting information about groundwater gradient and Adam wanted to modify the quarterly sampling schedule. I indicated that they should review the file for this information, but my review indicates that gradient is in to MW-1 except for one gradient from MW-1 to MW-4. I concur with their request to quarterly groundwater measurements of all wells, quarterly sampling of MW-1, MW-2,MW-3, and MW-9, then annual sampling of MW-4, MW-8, and MW-10. However, I said that MW-4 instead of MW-9 would seem better choice. but since MW-4 and MW-9 have both been non detect for hydrocarbons for most of the time, either well is okay.

Title Description Comments:

Action Type: Cleanup Action
Action: Excavation
Action Date: 3/15/1988
Received Issue Date:
Doc Link:
Title Description Comments:

In March 1988 380 cubic yards of diesel contaminated soil was excavated during UST removal and disposed at a facility ion Kettleman, California.

Action Type: Cleanup Action
Action: Monitored Natural Attenuation
Action Date: 3/19/1987
Received Issue Date:
Doc Link:
Title Description Comments:

Monitored natural attenuation begins with the installation of monitoring wells in March 1987, however, source material was not removed until March 1988, therefore, we assume that attenuation effectiveness improves after 1988.

Title Description Comments:

email with Steve Dalton at Kleinfelder, I said that after the three monitoring wells are destroyed according to Yolo Co. ordinances under permits from Yolo County Environmental Health Services at NFAR letter can be issued. Steve indicated in an earlier telephone call this day, that drilling is scheduled for 6 August 2007. I set a deadline for a report of the monitoring well destruction for 12 October 2007. I followed up with an email to Felix Yeung that I am approving destruction of the three monitoring wells for closure of the site.

Title Description Comments:

telephone conversation with Steve Dalton at Kleinfelder, I said we need a letter from the laboratory explaining why one page of the laboratory report shows hydrocarbons present after silica gel cleanup, and another page with the results of the same sample detected no hydrocarbons using silica gel cleanup (Kleinfelder report of 21 February 2007). Steve said he will check with the laboratory. Steve left a telephone voice mail on 16 July 2007 saying he is emailing a copy of the laboratory's explanation.

Title Description Comments:

meeting with Neil Doerhoff (Teal Family Trust/Raley', property owner), David Nybo with Signature Properties (prospective buyer and developer), John Baker and Steve Dalton of Kleinfelder, Jim Munch and David Stavarek of CVRWQCB. We discuss closure process, that data shows increasing concentrations of petroleum hydrocarbons in MW-3 and no groundwater data to northeast/east/southeast of MW-3. Based on data from the other wells and borings we would expect that petroleum hydrocarbons at MW-3 to be limited in extent to the EAST. John Baker indicates that increases coincide with changes in the level of groundwater, and believes that the effects are localized at MW-3. I concur that based on past cases in West Sacramento and site data, that petroleum hydrocarbons at MW-3 are probably just near that well. However, Jim Munch states that they need data to substantiate this claim and pass review by Supervisor. I state that additional data is needed to quantify the hydrocarbons remaining, and that they must show degradation, and time to meet water quality goals. They must also evaluate the human health risk associated with hydrocarbons remaining. Jim and I state that we can begin the Public Participation process because Neil states that the Teal Family Trust owns all surround property. I state that only the City of West Sacramento will be contacted. We end the meeting agreeing that three to four more geoprobe borings will be used to define the hydrocarbons around MW-3 and that we will send out Public Participation letter.

Highlights:	This property, located adjacent to the Bridge District area on the bank of the Sacramento River, is in the early stages of being developed as a hotel/mixed-use project. This Phase I was completed to satisfy one of the requirements related to financing the hotel project. Former Use: The property has been mostly vacant, although a portion of it is believed to have been used for a gasoline service station in the 1970s.

Highlights: This property, located adjacent to the Bridge District area on the bank of the Sacramento River, is in the early stages of being developed as a hotel/mixed-use project. This Phase I was completed to satisfy one of the requirements related to financing the hotel project. Former Use: The property has been mostly vacant, although a portion of it is believed to have been used for a gasoline service station in the 1970s.

Highlights: The Redevelopment Agency is considering the purchase of this property, located in the Bridge District (Triangle Specific Plan) area, a planned high-density mixed-use redevelopment area. The site is needed to install infrastructure that is necessary to advance the redevleopment of the Bridge District area. Former Use: The properties have historically been vacant and undeveloped. The properties are needed for right of way for future roadways and sidewalks to be developed to support new high-density, urban infill, mixed-use development in the City's Raley's Landing and Bridge District redevelopment projects.

Calenviroscreen 3 Score: 76-80%
Calenviroscreen 4 Score: 80-85%
Site History:

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Sites from GeoTracker Search - Cleanup Action Report (as of May 25, 2023)

Action Type:	OTHER (USE DESCRIPTION FIELD)
Begin Date:	7/11/2005
End Date:	7/15/2005
Phase:	Water, Water
Contaminant Mass Removed:	0 Pounds
Description:	11 July through 15 July 2005 batch extraction from two onsite wells removes 13,330 galllons of water, 0.0137 pounds of MtBE removed. Determined not an effective remedial alternative. 2 April through 6 April 2007 dual phase extraction from site wells was conducted. Approximately 44,000 gallons of groundwater is removed with 0.4 pounds of TPHg and 0.022 pounds of MtBE is removed. Natural Attenuation, estimated to achieve water quality goals by

2015 based on a decreasing trend of gasoline hydrocarbon concentrations in groundwater.

DFS- I called Jennifer Worsley at Apex, I agreed that remediation should be deferred until the results of the four quarters of quarterly sampling is completed. I said to send me an email so I can concur with that change.I also said that the plan she sent did not a knockout drum for the water, she said that they would put one in.. I said that we can discuss the first quarter 2008 groundwater results when they come in to determine whether closure is appropriate. I also said to calculate the degradation rate and trend line of hydrocarbons to determine when concentrations will reach water quality goals. I said that they need to meet all other standard closure requirements and do soil vapor survy for TPHg, BTEX, and MTBE using DTSC protol for the Health Risk assessment. Jennifer said that she would discuss the closure with me afterthey have the first quarter 2008 QMR.

Title Description Comments:

Electronic mail with consultant, Apex, Remediation will be delayed until after four quarters of quarterly groundwater sampling, as RWQCB staff agreed in our 8 March 2007 letter to RP. Four quarters end with the first quarter 2007 sampling event. Apex will include recommendations regarding remediation in the first quarter 2008 QMR.

Title Description Comments:

DFS- Jennifer Worsley at Apex left message , wants to discuss possible remediation. 13 November 2007 I call Jennifer Morsley at Apex, she said that they would like to do a short duration SVE if closure is not an option at this time.. I said that closure is not okay, but short duration SVE is okay. She called 11/16/2007 to request deferral of SVE test until four quarters of quarterly sampling have been performed as per my (Regional Board) 8 March 2007 letter.. I agreed that they could defer the SVE test until the four quarters of quarterly sampling then evaluated whether remediation is needed.

Former Relles Oil ketone analysis

Action Type: Other Regulatory Actions
Action: Technical Correspondence / Assistance / Other
Action Date: 4/4/2008
Received Issue Date: 4/4/2008
Doc Link:
Title Description Comments:

DFS email with Tom Ballard at Western Resources Management, consultant. Sent email to Tom that I discussed the issue of the ketones with my senior. I indicated that they can use old data to determine whether the 14 ketones in our water quality goals database are present, and if they are above the water quality goal. Or, they can resample and determine whether the 14 ketones are present. Must show they are not a threat to groundwater and not a risk to human health.

Action Type: Other Regulatory Actions
Action: Verbal Communication
Action Date: 3/25/2008
Received Issue Date: 3/25/2008
Doc Link:
Title Description Comments:

DFS telephone conversation with Tom Ballard at Western Resources Management. Tom left a message that they got our fax would like to have Kiff reevaluate the 2001 chromatograms to determine compounds present but need Wallace-Kuhl to release data having difficult with them, wil keep us informed of status of work.

4th Quarter 1996/1997 Monitoring Report Request for Site Closure

Action Type: Other Regulatory Actions
Action: Technical Correspondence / Assistance / Other
Action Date: 3/11/2008
Received Issue Date: 3/11/2008
Doc Link:
Title Description Comments:

DFS email with Tom Ballard at Western Resources Management, consultant. Ask Tom questions about location of a waste oil tank, was it underground or above ground, and for copies of documents that that they have but we don't have in our files. During this correspondence I indicated to Tom that I found information indicating the waste oil tank was an above ground tank. I also ask Tom to evaluate the detection of Ketones that were detected and reported as TPH diesel in 2001. Tom says he will work on this.

Title Description Comments:

Letter from Mr. Daniel Whaley asking when closure report would be through and could they expect an NRAR letter within 30 days, as they are negotiating with tenants. I sent email to Mr. Whaley that I would not be able to review closure request no sooner than second week of March, so best estimate to get through review process would be by 7 April 2008, and a NFAR letter following short after.

LUST YOLO

County: YOLO

Details

File No: UST 12 E
Status: CLOSED
Material: GASOLINE
Comments: FILE L 12 - THREE 8,000-GALLON GASOLINE TANKS WERE REMOVED FROM THE SITE AND A WASTE OIL TANK APPARENTLY ABANDONED IN PLACE IN 1996. DIFFERENT CONSULTANTS HAVE COMPLETED SEVERAL INVESTIGATIONS BUT THE SITE HAS NOT BEEN THOROUGHLY DEFIED. HOWEVER, THERE IS ENOUGH DATA TO INDICATE THAT THE OCCURRENCE OF SUBSURFACE CONTAMINATION IS SPOTTY AND MINOR IN NATURE. CASE CLOSED BY THE CVRWQCB IN JUNE 1997. FILE ARCHIVED TO 00012UTH IN DECEMBER 2003.

Composting Method:
Grndwtr Monitoring Frequency: # OF WELLS MONITORED - QUARTERLY : 1, SEMI-ANNUALLY : 1, ANNUALLY : 4

REASONS FOR QUARTERLY OR MONTHLY OR OTHER GROUNDWATER MONITORING:
Other - By RWQCB staff letter of 27 July 2009 the quarterly sampling was change to: Annual sampling during the third quarter of each calendar year for monitoring wells MW-1, MW-2, MW-4, and MW-5, and semi-annual sampling of MW-3 during the first and third quarters appears appropriate for your site. You must analyze a groundwater sample from MW-6 for the next two quarters (third and fourth) to monitor the downward trend of gasoline hydrocarbons in this well; this data is needed to support your claim for case closure.
Designated Beneficial Use Desc: Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply
Site History:

Sites from GeoTracker Search - Cleanup Action Report (as of May 25, 2023)

Action Type: MONITORED NATURAL ATTENUATION
Begin Date: 5/15/2008
End Date:
Phase: Water
Contaminant Mass Removed:
Description: Concentrations of petroleum hydrocarbons do not appear to require active remediation, therefore, RP will conduct additional quarterly monitoring to verify natural attenuation. Monitoring wells installed, monitored natural attenuation begins, no estimate of mass petroleum hydrocarbons degraded

Title Description Comments:

Email with consultant - 7 December 2009 6:15 To: Scott Armstrong From: David Stavarek re: Turner Land Company, 800 Sacramento Avenue, West Sacramento, Yolo Co. Scott, I have the July 2009 closure request, but due to priorities assigned by management I am not able to work on this case at this time. However, if the groundwater data indicates that additional groundwater sampling is not necessary then you may stop sampling. Please note that groundwater data must show the plume is defined (lateral and vertical), and if contaminants remain in groundwater there must be sufficient data to show a decreasing trend. If these conditions have not been met then additional groundwater sampling is necessary to support your closure request. However, you can do semi-annual sampling if that will provide sufficient data to comply with the conditions stated above. I will try to get to your case as soon as work permits, until then, conduct work as necessary. David. David Stavarek, P.G. Engineering Geologist CVRWQCB R5S, UST Unit II 11020 Sun Center Drive, No. 200 Rancho Cordova, 95670 (916) 464-4673 off. (916) 464-4704 fax dstavarek@waterboards.ca.gov

Title Description Comments:

Email RWQCB with consultant - 17 August 2009 8:10 To: Scott Armstrong From: David Stavarek re: West Sacramento Land co. Property, 800 Sacramento Ave., West Sacramento, Yolo Co. Scott, After re-review of the first quarter 2009 quarterly report, you stop sampling of wells MW-1, MW-2, MW-4, and MW-5 until directed otherwise by us. However, wells MW-3 and MW-6 must be sampled during the third quarter. If the results of the third quarter sampling of wells MW-3 and MW-6 follow the current downward trend, then additional sampling of these two wells will not be necessary. However, due to State Water Resources Control Board Resolution No. 42 and subsequent directives from our Executive Officer, I now have new priorities. When these new priorities have been satisfied I will return to regular case work based on chronological order of receipt of documents. At this time I am unable to give you an estimate of when I will be able to review your closure request, therefore, please check again in 3 to 4 weeks. David. David Stavarek, P.G. Engineering Geologist CVRWQCB R5S, UST Unit II 11020 Sun Center Drive, No. 200 Rancho Cordova, 95670 (916) 464-4673 off. (916) 464-4704 fax dstavarek@waterboards.ca.gov >>> "Scott Armstrong" 8/13/2009 9:39 AM >>> David, I've received your letter review of our NFA request for this property and I have a few questions about your request for additional sampling. I see that you're on vacation until the week of August 17th, so please put me on your call back list for when you return to discuss. I also have a few questions about your response to our NFA request for the former Spreckels facility in Woodland. Scott -----Original Message----- From: Scott Armstrong Sent: Thursday, July 23, 2009 10:55 AM To: 'David Stavarek' Cc: Mari O'Brien; 'dstavarek@waterboards.ca.gov' Subject: 800 Sacramento Avenue NFAR David, Yesterday we published the No Further Action Request for 800 Sacramento Avenue, West Sacramento, California. An electronic copy will be uploaded to GeoTracker and is also attached for your convenience. Per your previous correspondences, we will send Jeff Pinnow at Yolo County a PDF of the file. Please let me or Mari O'Brien know if you have any questions or comments on our NFAR submittal. Scott A. Armstrong, REA, P.G., C.HG., CEM Wallace-Kuhl & Associates, Inc. 3251 Beacon Boulevard, Suite 200 West Sacramento, CA 95691 916-372-1434 (office) 916-275-0335 (cell) 916-290-5429 (fax) www.wallace-kuhl.com << File: 8033.05 - NFAR.pdf >>

Calenviroscreen 3 Score: 76-80%
Calenviroscreen 4 Score: 80-85%
Site History:

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Sites from GeoTracker Search - Cleanup Action Report (as of May 25, 2023)

Action Type: PUMP & TREAT (P&T) GROUNDWATER
Begin Date: 5/10/1996
End Date: 5/15/1996
Phase: Water

Contaminant Mass Removed:
Description: During a remediation pilot test up to 6000 gallons of groundwater was extracted, treated, then disposed in the sanitary sewer. No estimate of the mass removed.

Action Type: MONITORED NATURAL ATTENUATION
Begin Date: 12/17/1991
End Date:
Phase: Water
Contaminant Mass Removed:
Description: Wells were installed in December 1991, thus, natural attenuation could begin.

telephone conversation with responsible party - I (DFS) spoke with Paul Dirksen at City of West Sacramento, I said that I need a date when the waste from the well destruction was removed from the site. Paul said he would have Ninyo & Moore contact me with that information. On 20 October 2014 I called Mr. Dirksen and said because I did not get the information from Ninyo and Moore the previous week that we had to delay sending out the NFAR letter; I said that Ninyo & Moore had email problems with sending me the information.

Email from RP - Dave, (David Grunat, M.SC. Senior Geologist URS Corporation) Per our conversation, I requested that my consultant Ninyo and Moore provide a cost estimate for a final sampling event prior to the well abandonments. The cost estimate is provided for your consideration below. here is the pricing you are looking for regarding sampling of MW-12 and MW-13: Lab to include: TPHd, TPHg, BTEX, Fuel Oxygenates and Naphthalene: $350 N&M Labor & Equipment: $750 It is understood that you will coordinate with me and/or Ninyo and Moore on the date of the proposed abandonment, so that Ninyo and Moore can complete a final groundwater sampling. Ninyo and Moore will be present on the site, collect the sample and be responsible for chain of custody and sampling analysis. Please specify how this work will be paid for. Would you like Ninyo and Moore or the City to invoice you for the sampling? Let me know if you have any questions or concerns with these terms. Paul Paul Dirksen City of West Sacramento

Title Description Comments:

Email with Consultant - Jim, Thank you for taking my call just now. To follow up, PG&E is preparing to construct a pipeline down West Capitol Avenue. Through site walks, it was determined that wells MW-12 and MW-13 associated with 1725 West Capitol Avenue in West Sacramento (Case #570083) are in the right of way of the pipeline. In order to allow construction to begin, those wells will need to be properly abandoned. I have spoken with Paul Dirksen (916-617-4555, dblamer@ninyoandmoore.com) regarding this abandonment. He stated that he has applied for closure; however, the city required more information on downgradient delineation. He currently does not have funding to continue working on the site at this time. As construction is slated to begin in June, we will need to remove the wells as soon as possible. If you could please let me know what we need to submit in order to facilitate this I would appreciate it. Thanks for your assistance with this project. Best, David Grunat, M.SC. Senior Geologist URS Corporation 1333

Remediation Schedule - David, With regards to the proposed additional injection event, the plan is implement a modified Fenton's reaction in the on-site source area by injecting approximately 400 gallons of a slow release hydrogen peroxide solution supplemented with calcium peroxide into two injection wells and 12 DPT injection points. About 160 gallons of iron catalyst (ferric citrate) will also be injected into each injection point. Injections will proceed at about 1 to 2 injection points per day over a two to three week period. To accomodate a scheduled media event, the injections will begin next week. John Werfal Regional Director Bureau Veritas North America, Inc. Title Description Comments:

DFS telephone conversation with Paul Dirksen at City of West Sacramento - Paul called to ask how their new consultant, Bureau Veritas can access Geotracker to upload data/documents. I said that the RP usually gets an ID number from Geotracker and then can give that to the consultant to upload to Geotracker. I said that Wallace-Kuhl was doing that when they were active on the case. I suggested that Paul call Wallace-Kuhl regarding the ID Number. Paul asked about the necessity of backfilling the boring with grout because they will be removed during the excavation work. I said it is standard practive to backfill borings to prevent other pollutants from entering the subsurface/groundwater. I said there are cases where a boring may remain open overnight, but the top of the hole must be secured to prevent access, and sealed to prevent fluids from entering the borehole. I said if excavation work is not the next day then this would not be an appropriate action. I said that any work regarding boreholes must receive the approval of Yolo County Environmental Health Services because they issue the boring permits. Paul

Title Description Comments:

Dvid Stavarek, RWQCV Jim Munch, Sr RWQCB Mark Nichols, Wallace-Kuhl Matt Taylor, Wallace-Kuhl Paul Dirksen, Cith of West Sacramento At meeting we discussed the possible investigation, remediation, and health risk assessment that needs to be done. Pat states that all papers must be in to their office by 1 November 2007. We discuss remediation by excavation, and possible onsite land farming, but this will cause problems to nearby residents, so we discuss off disposal of soil. We indicate that the RP will have to submit a letter explaining that disposl of soil onsite for land farming.

Action Type: Other Regulatory Actions
Action: Verbal Communication
Action Date: 10/4/2007
Received Issue Date: 10/4/2007
Doc Link:
Title Description Comments:

I (David Stavarek, RWQCB) called Paul Dirksen at City of West Sacramento, Grants and Community Development. We discussed remediation options for the site. I agreed that limited excavation was appropriate, but that they must show this is the most cost effective remediation option for the site to have the UST Cleanup Fund approve reimbursement of this remedial option. They can not use time as the only reason this is a better remediation

option. Cost and effectiveness are the criteria for the cleanup fund. I said that the followup costs for Monitored Attentuation were high and what capital costs represented. I said that their consultant, Wallace-Kuhl, needs to explain these aspects of the remediation proposed. Paul said he will discuss this with Wallace-Kuhl.

Details

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

File No:	H499
Status:	OPEN
Material:	GASOLINE AND DIESEL
Comments:	INVESTIGATIVE WORK WAS DONE IN DECEMBER 2006 TO DETERMINE WHETHER SOIL AND GROUNDWATER AT THE SITE HAD BEEN IMPACTED WITH PETROLWUM HYDROCARBONS DUE TO LEAKAGE FROM UST'S THAT HAD BEEN LOCATED ON THE SITE YEARS AGO. BOTH GASOLINE AND DIESEL WERE DETECTED IN SOIL AND GROUNDWATER. UAR WAS RECEIVED ON 01/11/2007. FORWARDED CASE TO REGIONAL WATER BOARD ON 03/22/2007.

Site History:

The Capitol Plating Site is a former metal-plating facility located at 319 Third Street, West Sacramento. The facility was a single 80-foot by 160-foot lot located in a mixed commercial/residential area. The facility consisted of a single warehouse type building with dimensions of 40-foot by 113-foot. Investigations indicate soils and groundwater beneath the facility lot and adjacent lots are contaminated with heavy metals and the chlorinated solvent 1,2-DCA. DTSC conducted additional characterization work (Targeted Site Investigation) during 2005 pursuant to a Brownfields grant from the U.S. EPA. The facility structure was demolished during 2005. Soil contamination remains. In May 2020 an Imminent and Substantial Endangerment Determination and Order was issued to all identified Potentially Responsible Parties.

CHROMIUM VI
NICKEL

Site History:

The Capitol Plating Site is a former metal-plating facility located at 319 Third Street, West Sacramento. The facility was a single 80-foot by 160-foot lot located in a mixed commercial/residential area. The facility consisted of a single warehouse type building with dimensions of 40-foot by 113-foot. Investigations indicate soils and groundwater beneath the facility lot and adjacent lots are contaminated with heavy metals and the chlorinated solvent 1,2-DCA. DTSC conducted additional characterization work (Targeted Site Investigation) during 2005 pursuant to a Brownfields grant from the U.S. EPA. The facility structure was demolished during 2005. Soil contamination remains. In May 2020 an Imminent and Substantial Endangerment Determination and Order was issued to all identified Potentially Responsible Parties.

QUARTERLY UPDATE: April 1, 2023 – June 30, 2023

• A Ramos Environmental Services (Ramos) permit renewal reminder letter was issued to Ramos on 4/17/2023. Ramos shall submit a permit renewal application two years prior to the expiration of their current permit which expires April 19, 2026.

The Series C Standardized Hazardous Waste Facility Permit was issued on April 20, 2016 and it became effective immediately on April 20, 2016 because the one comment received did not cause the permit to be changed. The permit will expire on April 19, 2026. A notice of the Final Permit Decision was mailed out along with the Response to Comments document and a copy of the permit to all persons on the DTSC Mandatory Mailing List, persons who attended the hearing, and persons who provided comments, and to persons who requested notification. The Notice was also sent via email to those persons who requested and provided an email.

FACILITY DESCRIPTION/ HISTORY

Ramos Oil Recyclers Inc. DBA Ramos Environmental Services (RES) operates a hazardous waste transfer and storage facility (the Facility), located at 1515 South River Road, West Sacramento, 95691, in Yolo County California. The Facility is located on the west bank of the Sacramento River about 2,500 feet downstream from the Pioneer Memorial Bridge. The Facility has been located at its present site since 1979. The size of the Facility is 15.6 acres and is bounded on the north by Shell Oil Company, west by the Southern Pacific Pipe Line Company, south by Arco Oil Company, and east by the Sacramento River and levee system. The terrain of the Facility is level and the surrounding area is also relatively level. The Facility is developed with several single-story warehouses, office buildings, asphalt and concrete parking lots, and contains a corporation yard. Virgin petroleum products are stored in the three warehouses that total about 7,450 square feet in space. Of the 15.6 acre property, 2,700 square feet of the Facility is used for hazardous waste storage and transfer. A fueling dock for truck-to-boat fueling is situated along the Sacramento River and operates as part of Ramos oil Company's fueling station.

The Facility is a Non-RCRA hazardous waste storage and transfer facility. The Facility collects, handles, bulks, consolidates, stores, and transfers used oil, oily wastewater and waste antifreeze. RES is also a registered hazardous waste transporter for Used Oil, Oily Wastewater, and Used Antifreeze from known offsite generators via manifest on a "milk-run" basis using their own bulk tanker and vacuum trucks.

The Facility manages hazardous wastes in three (3) areas, a Tank Storage Area, Loading Unloading Pad, and a Container Storage Area. Currently the permit identified nine (9) hazardous waste management units within these 3 areas.
These units include Tank 1, Tank 2, Tank 3, Tank 4, tank 5, Drum Storage Area, Truck to Truck Transfer, Roll Off Sludge/Solids Storage, and Sump Tank. Used oil, antifreeze, oily water, and oily sludge are pumped from trucks in the Loading Unloading Pad into above ground storage tanks. When a tank is full, the waste is pumped out of the tank into larger trucks to be transported to a permitted hazardous waste facility for disposal and/or recycling. RES also bulks Non-RCRA solids into roll-off containers inside the Loading Unloading Pad which are transported to permitted hazardous waste facilities for disposal. RES performs Truck to Truck transfers of Non-RCRA Liquids. RES also pumps oil, antifreeze, and oily water from containers to the storage tanks and/or trucks. Other waste managed at the site include the rinsate from truck washing, this waste is pumped into the oily water tank and disposed of at an offsite facility as a Non-RCRA waste. The waste accepted at the site is generally from offsite sources such as automotive repair shops, manufacturing, and the government.

PERMITTING REGULATORY DESCRIPTION/ HISTORY

RES operates the Facility under a Series B Standardized Hazardous Waste Facility Permit from DTSC with an effective date of May 18, 1999 and Expiration date of May 18, 2009. A permit application to renew the permit was submitted on August 22, 2008. RES is operating the Facility under the 1999 permit until DTSC makes a final permit decision on the permit renewal application.

The Facility, as well as adjacent surrounding properties, has been used for industrial purposes since 1951. The Facility has been located at its present site since 1979 and has been operating the Hazardous Waste Management Units since 1988. RES received its first permit on June 30, 1988. The permit was a "full" permit; however the "full" permit was converted to a Series C Standardized Permit on December 31, 1993.

In 1999, DTSC issued a Series B Standardized Hazardous Waste Facility Permit to authorize RES to continue operating the Facility as a non-RCRA

hazardous waste storage and transfer facility for used oil activities. This permit also authorized the Facility to handle, bulk, consolidate, store, and transfer two (2) new waste streams-- non-RCRA oily wastewater and waste antifreeze. The 1999 permit also authorized the Facility to add a 118-drum capacity Container Storage Area, a 75,000 gallon capacity tank, to conduct truck-to-truck transfer of liquid hazardous waste, and loading and bulking of non-RCRA organic solid waste and oil contaminated sludge/soils from site clean-ups in large roll-off containers on the Loading and Unloading Pad. In addition, the 1999 permit authorized the Facility to store used oil filters and empty containers in the Container Storage Area. All the newly authorized units, equipment and activities were added except for the 75,000 gallon tank, which has not been built.

QUARTERLY UPDATE: July 1, 2023 – August 31, 2023

• A Ramos Environmental Services (Ramos) permit renewal reminder letter was issued to Ramos on 4/17/2023. Ramos shall submit a permit renewal application two years prior to the expiration of their current permit which expires April 19, 2026. The site tour and pre-application meeting to discuss the permit renewal application process was held on 8/25/2023.

The Series C Standardized Hazardous Waste Facility Permit was issued on April 20, 2016 and it became effective immediately on April 20, 2016 because the one comment received did not cause the permit to be changed. The permit will expire on April 19, 2026. A notice of the Final Permit Decision was mailed out along with the Response to Comments document and a copy of the permit to all persons on the DTSC Mandatory Mailing List, persons who attended the hearing, and persons who provided comments, and to persons who requested notification. The Notice was also sent via email to those persons who requested and provided an email.

FACILITY DESCRIPTION/ HISTORY

Ramos Oil Recyclers Inc. DBA Ramos Environmental Services (RES) operates a hazardous waste transfer and storage facility (the Facility), located at 1515 South River Road, West Sacramento, 95691, in Yolo County California. The Facility is located on the west bank of the Sacramento River about 2,500 feet downstream from the Pioneer Memorial Bridge. The Facility has been located at its present site since 1979. The size of the Facility is 15.6 acres and is bounded on the north by Shell Oil Company, west by the Southern Pacific Pipe Line Company, south by Arco Oil Company, and east by the Sacramento River and levee system. The terrain of the Facility is level and the surrounding area is also relatively level. The Facility is developed with several single-story warehouses, office buildings, asphalt and concrete parking lots, and contains a corporation yard. Virgin petroleum products are stored in the three warehouses that total about 7,450 square feet in space. Of the 15.6 acre property, 2,700 square feet of the Facility is used for hazardous waste storage and transfer. A fueling dock for truck-to-boat fueling is situated along the Sacramento River and operates as part of Ramos oil Company's fueling station.

The Facility is a Non-RCRA hazardous waste storage and transfer facility. The Facility collects, handles, bulks, consolidates, stores, and transfers used oil, oily wastewater and waste antifreeze. RES is also a registered hazardous waste transporter for Used Oil, Oily Wastewater, and Used Antifreeze from known offsite generators via manifest on a "milk-run" basis using their own bulk tanker and vacuum trucks.

The Facility manages hazardous wastes in three (3) areas, a Tank Storage Area, Loading Unloading Pad, and a Container Storage Area. Currently the permit identified nine (9) hazardous waste management units within these 3 areas.
These units include Tank 1, Tank 2, Tank 3, Tank 4, tank 5, Drum Storage Area, Truck to Truck Transfer, Roll Off Sludge/Solids Storage, and Sump Tank. Used oil, antifreeze, oily water, and oily sludge are pumped from trucks in the Loading Unloading Pad into above ground storage tanks. When a tank is full, the waste is pumped out of the tank into larger trucks to be transported to a permitted hazardous waste facility for disposal and/or recycling. RES also bulks Non-RCRA solids into roll-off containers inside the Loading Unloading Pad which are transported to permitted hazardous waste facilities for disposal. RES performs Truck to Truck transfers of Non-RCRA Liquids. RES also pumps oil, antifreeze, and oily water from containers to the storage tanks and/or trucks. Other waste managed at the site include the rinsate from truck washing, this waste is pumped into the oily water tank and disposed of at an offsite facility as a Non-RCRA waste. The waste accepted at the site is generally from offsite sources such as automotive repair shops, manufacturing, and the government.

PERMITTING REGULATORY DESCRIPTION/ HISTORY

RES operates the Facility under a Series B Standardized Hazardous Waste Facility Permit from DTSC with an effective date of May 18, 1999 and Expiration date of May 18, 2009. A permit application to renew the permit was submitted on August 22, 2008. RES is operating the Facility under the 1999 permit until DTSC makes a final permit decision on the permit renewal application.

The Facility, as well as adjacent surrounding properties, has been used for industrial purposes since 1951. The Facility has been located at its present site since 1979 and has been operating the Hazardous Waste Management Units since 1988. RES received its first permit on June 30, 1988. The permit was a "full" permit; however the "full" permit was converted to a Series C Standardized Permit on December 31, 1993.

In 1999, DTSC issued a Series B Standardized Hazardous Waste Facility Permit to authorize RES to continue operating the Facility as a non-RCRA hazardous waste storage and transfer facility for used oil activities. This permit also authorized the Facility to handle, bulk, consolidate, store, and transfer two (2) new waste streams-- non-RCRA oily wastewater and waste antifreeze. The 1999 permit also authorized the Facility to add a 118-drum capacity Container Storage Area, a 75,000 gallon capacity tank, to conduct truck-to-truck transfer of liquid hazardous waste, and loading and bulking of non-RCRA organic solid waste and oil contaminated sludge/soils from site clean-ups in large roll-off containers on the Loading and Unloading Pad. In addition, the 1999 permit authorized the Facility to store used oil filters and empty containers in the Container Storage Area. All the newly authorized units, equipment and activities were added except for the 75,000 gallon tank, which has not been built.

QUARTERLY UPDATE: July 1, 2023 – August 31, 2023

• A Ramos Environmental Services (Ramos) permit renewal reminder letter was issued to Ramos on 4/17/2023. Ramos shall submit a permit renewal application two years prior to the expiration of their current permit which expires April 19, 2026. The site tour and pre-application meeting to discuss the permit renewal application process was held on 8/25/2023.

The Series C Standardized Hazardous Waste Facility Permit was issued on April 20, 2016 and it became effective immediately on April 20, 2016 because the one comment received did not cause the permit to be changed. The permit will expire on April 19, 2026. A notice of the Final Permit Decision was mailed out along with the Response to Comments document and a copy of the permit to all persons on the DTSC Mandatory Mailing List, persons who attended the hearing, and persons who provided comments, and to persons who requested notification. The Notice was also sent via email to those persons who requested and provided an email.

FACILITY DESCRIPTION/ HISTORY

Ramos Oil Recyclers Inc. DBA Ramos Environmental Services (RES) operates a hazardous waste transfer and storage facility (the Facility), located at 1515 South River Road, West Sacramento, 95691, in Yolo County California. The Facility is located on the west bank of the Sacramento River about 2,500 feet downstream from the Pioneer Memorial Bridge. The Facility has been located at its present site since 1979. The size of the Facility is 15.6 acres and is bounded on the north by Shell Oil Company, west by the Southern Pacific Pipe Line Company, south by Arco Oil Company, and east by the Sacramento River and levee system. The terrain of the Facility is level and the surrounding area is also relatively level. The Facility is developed with several single-story warehouses, office buildings, asphalt and concrete parking lots, and contains a corporation yard. Virgin petroleum products are stored in the three warehouses that total about 7,450 square feet in space. Of the 15.6 acre property, 2,700 square feet of the Facility is used for hazardous waste storage and transfer. A fueling dock for truck-to-boat fueling is situated along the Sacramento River and operates as part of Ramos oil Company's fueling station.

The Facility is a Non-RCRA hazardous waste storage and transfer facility. The Facility collects, handles, bulks, consolidates, stores, and transfers used oil, oily wastewater and waste antifreeze. RES is also a registered hazardous waste transporter for Used Oil, Oily Wastewater, and Used Antifreeze from known offsite generators via manifest on a "milk-run" basis using their own bulk tanker and vacuum trucks.

The Facility manages hazardous wastes in three (3) areas, a Tank Storage Area, Loading Unloading Pad, and a Container Storage Area. Currently the permit identified nine (9) hazardous waste management units within these 3 areas.
These units include Tank 1, Tank 2, Tank 3, Tank 4, tank 5, Drum Storage Area, Truck to Truck Transfer, Roll Off Sludge/Solids Storage, and Sump Tank. Used oil, antifreeze, oily water, and oily sludge are pumped from trucks in the Loading Unloading Pad into above ground storage tanks. When a tank is full, the waste is pumped out of the tank into larger trucks to be transported to a permitted hazardous waste facility for disposal and/or recycling. RES also bulks Non-RCRA solids into roll-off containers inside the Loading Unloading Pad which are transported to permitted hazardous waste facilities for disposal. RES performs Truck to Truck transfers of Non-RCRA Liquids. RES also pumps oil, antifreeze, and oily water from containers to the storage tanks and/or trucks. Other waste managed at the site include the rinsate from truck washing, this waste is pumped into the oily water tank and disposed of at an offsite facility as a Non-RCRA waste. The waste accepted at the site is generally from offsite sources such as automotive repair shops, manufacturing, and the government.

PERMITTING REGULATORY DESCRIPTION/ HISTORY

RES operates the Facility under a Series B Standardized Hazardous Waste Facility Permit from DTSC with an effective date of May 18, 1999 and Expiration date of May 18, 2009. A permit application to renew the permit was submitted on August 22, 2008. RES is operating the Facility under the 1999 permit until DTSC makes a final permit decision on the permit renewal application.

The Facility, as well as adjacent surrounding properties, has been used for industrial purposes since 1951. The Facility has been located at its present site since 1979 and has been operating the Hazardous Waste Management Units since 1988. RES received its first permit on June 30, 1988. The permit was a "full" permit; however the "full" permit was converted to a Series C Standardized Permit on December 31, 1993.

In 1999, DTSC issued a Series B Standardized Hazardous Waste Facility Permit to authorize RES to continue operating the Facility as a non-RCRA hazardous waste storage and transfer facility for used oil activities. This permit also authorized the Facility to handle, bulk, consolidate, store, and transfer two (2) new waste streams-- non-RCRA oily wastewater and waste antifreeze. The 1999 permit also authorized the Facility to add a 118-drum capacity Container Storage Area, a 75,000 gallon capacity tank, to conduct truck-to-truck transfer of liquid hazardous waste, and loading and bulking of non-RCRA organic solid waste and oil contaminated sludge/soils from site clean-ups in large roll-off containers on the Loading and Unloading Pad. In addition, the 1999 permit authorized the Facility to store used oil filters and empty containers in the Container Storage Area. All the newly authorized units, equipment and activities were added except for the 75,000 gallon tank, which has not been built.

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)
TPH-GAS
VOLATILE ORGANICS (8260B VOCS)

Site History:

The California Department of Transportation (CalTrans)I-5 Q-Street Off-Ramp site is located within the Interstate 5 right-of-way near the former intersection of Front and T Streets in Sacramento and adjacent to Sacramento Municipal Utility District property. The site was discovered during the groundwater investigation for the PG&E-Sacramento site. Historical uses of the property include utilized for vehicle maintenance, fueling and storage. Currently, the land is a vacant parcel that lies between the Interstate 5 freeway and the Q Street Off-ramp. Major landmarks in the vicinity of the site are the Sacramento River, to the West, and Interstate 5, to the East, and the Towe Auto Museum, to the South.

DTSC approved the RAP in May of 1991 which describes the remediation necessary for the Front & T Street Sites. On June 30, 1997 DTSC approved the RAW for the soil remediation at the Site. The Draft RAW was release for public comment on May 26, 1997 and the 30-day public comment period ended on June 26, 1997. The groundwater investigation revealed that the site was a source of contaminants which were migrating to the groundwater. The majority of the contamination source was excavated and disposed off-site. The remaining contamination is being addressed by a Groundwater Extraction and Treatment System (GWETs). A seasonal Soil Vapor Extraction and Treatment System (SVETs) has operated at the site since November of 1999 and will be decommissioned in 2007-2008. Operation and Maintenance (O&M)Plans were developed as well as an O&M Agreement completed. The remedy at this site has multiple components:
Soil: Excavation of 16,060 tons of contaminated soil. The excavation encompassed the Site and the adjacent SMUD Site.
Groundwater: Removal of contaminants from the vadose zone by the SVETs which operated at the Site from November of 1999 through May of 2007. The SVETs is estimated to have captured and treated 126 pounds of reactive organic compounds and 47 pounds of benzene. The majority of the mass removal occurred during the first four years of operation.
Continued operation of the GWETs located on the PG&E Sacramento site to remove residual amounts of Site contaminants. Continued groundwater monitoring to ensure contaminant migration above established limits is not migrating to the Ranney Collector.
Institutional Control: Recordation of an LUC to provide for the continued operation of the GWETs, associated monitoring wells, and prohibits certain uses of the Site.
Operation & Maintenance: An O&M agreement for this site (Enforceable Agreement Docket Number HAS-O&M 07/08-074) for the continued operation, maintenance and monitoring of the remedial systems necessary to protect public health has been executed and an assurance mechanism is in place.

On April 30, 2008 DTSC completed the certification process and found that the Site should be deleted from the "active" site list. However, the site will be placed on the list of sites undergoing O&M to ensure proper monitoring of long-term clean-up efforts. The certification was based on the fact that DTSC determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing O&M.

Annual LUC Compliance Inspections of this site are performed on an annual basis. Site specific compliance reporting for this site ended in 2017. This site is now inspected in conjunction with PG&E Sacramento Site. Compliance documents can be found at:

Sub Area Link:
Document Type: Removal Action Workplan
Date Completed: 4/27/2001
Comments: RAW - The public comment period for the Draft Final Groundwater Engineering Evaluation/Cost Analysis (EE/CA) and Remedial Action Work Plan (RAW) for the Front & T Street sites, Sacramento, California, for the Front Street Joint Defense Group (JDG) ended on April 3, 2001. DTSC received no comment on the above mentioned document and therefore granted final approval for said RAW. The RAW calls for a monitored natural attenuation (MNA) remedy combined with continued operation of the pump and treat system on PG&E site. A contingent remedy, which will be implemented if Site conditions change, is also funded as part of this RAW. Implementation of this RAW is designed to meet the groundwater cleanup objectives for all of the Front & T Street Sites. These Sites include: 1) PG&E Sacramento - Former MGP 2) CalTrans I-5, Q Street Off-ramp 3) SHRA - 1920 Front Street and 4) SMUD - Front and T Street.

Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL
Potential Contamin of Concern:

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)
TPH-GAS
VOLATILE ORGANICS (8260B VOCS)

Site History:

The California Department of Transportation (CalTrans)I-5 Q-Street Off-Ramp site is located within the Interstate 5 right-of-way near the former intersection of Front and T Streets in Sacramento and adjacent to Sacramento Municipal Utility District property. The site was discovered during the groundwater investigation for the PG&E-Sacramento site. Historical uses of the property include utilized for vehicle maintenance, fueling and storage. Currently, the land is a vacant parcel that lies between the Interstate 5 freeway and the Q Street Off-ramp. Major landmarks in the vicinity of the site are the Sacramento River, to the West, and Interstate 5, to the East, and the Towe Auto Museum, to the South.

DTSC approved the RAP in May of 1991 which describes the remediation necessary for the Front & T Street Sites. On June 30, 1997 DTSC approved the RAW for the soil remediation at the Site. The Draft RAW was release for public comment on May 26, 1997 and the 30-day public comment period ended on June 26, 1997. The groundwater investigation revealed that the site was a source of contaminants which were migrating to the groundwater. The majority of the contamination source was excavated and disposed off-site. The remaining contamination is being addressed by a Groundwater Extraction and Treatment System (GWETs). A seasonal Soil Vapor Extraction and Treatment System (SVETs) has operated at the site since November of 1999 and will be decommissioned in 2007-2008. Operation and Maintenance (O&M)Plans were developed as well as an O&M Agreement completed. The remedy at this site has multiple components:
Soil: Excavation of 16,060 tons of contaminated soil. The excavation encompassed the Site and the adjacent SMUD Site.
Groundwater: Removal of contaminants from the vadose zone by the SVETs which operated at the Site from November of 1999 through May of 2007. The SVETs is estimated to have captured and treated 126 pounds of reactive organic compounds and 47 pounds of benzene. The majority of the mass removal occurred during the first four years of operation.
Continued operation of the GWETs located on the PG&E Sacramento site to remove residual amounts of Site contaminants. Continued groundwater monitoring to ensure contaminant migration above established limits is not migrating to the Ranney Collector.
Institutional Control: Recordation of an LUC to provide for the continued operation of the GWETs, associated monitoring wells, and prohibits certain uses of the Site.
Operation & Maintenance: An O&M agreement for this site (Enforceable Agreement Docket Number HAS-O&M 07/08-074) for the continued operation, maintenance and monitoring of the remedial systems necessary to protect public health has been executed and an assurance mechanism is in place.

On April 30, 2008 DTSC completed the certification process and found that the Site should be deleted from the "active" site list. However, the site will be placed on the list of sites undergoing O&M to ensure proper monitoring of long-term clean-up efforts. The certification was based on the fact that DTSC determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing O&M.

Annual LUC Compliance Inspections of this site are performed on an annual basis. Site specific compliance reporting for this site ended in 2017. This site is now inspected in conjunction with PG&E Sacramento Site. Compliance documents can be found at:

Document Type: Removal Action Workplan
Date Completed: 4/27/2001
Comments: RAW - The public comment period for the Draft Final Groundwater Engineering Evaluation/Cost Analysis (EE/CA) and Remedial Action Work Plan (RAW) for the Front & T Street sites, Sacramento, California, for the Front Street Joint Defense Group (JDG) ended on April 3, 2001. DTSC received no comment on the above mentioned document and therefore granted final approval for said RAW. The RAW calls for a monitored natural attenuation (MNA) remedy combined with continued operation of the pump and treat system on PG&E site. A contingent remedy, which will be implemented if Site conditions change, is also funded as part of this RAW. Implementation of this RAW is designed to meet the groundwater cleanup objectives for all of the Front & T Street Sites. These Sites include: 1) PG&E Sacramento - Former MGP 2) CalTrans I-5, Q Street Off-ramp 3) SHRA - 1920 Front Street and 4) SMUD - Front and T Street.

LEAD

Site History:

Site includes APNs 006-0135-028, 029.

The Lot X site is the location of a "former gas and oil facility". Currently, the Site is divided into two portions by a paved street (former Slip Street). The western portion of the Site is a paved public parking lot operated by the City of Sacramento, while the eastern portion is a landscaped area with mature trees. The owner wants to cleanup the property for potential future reuse.

As of June 7, 2019, the Local Oversight Program (LOP) site was referred from Sacramento County to CVRWQCB to manage the Underground Strorage Tank (UST) closure/groundwater, and DTSC will manage the soil cleanup under a Standard Voluntary Agreement (SVA).

GeoTracker link: https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0606716751

A draft Removal Action Workplan (RAW) to remove soil contaminated with lead at the Lot X Site is now open for public review and comment.

(12/06/2019 MG)

The Removal Action Workplan (RAW) was approved for implementation in July 2020. There were eight (8) target excavation areas, and approximately 108 cubic yards of soil were removed. Following DTSC's Proven Technologies & Remedies guidance, the representative concentration (95% UCL) for the remaining lead in Site soil is 41 mg/kg, which is well below the cleanup goal of 80 mg/kg for unrestricted land use. DTSC approved the Removal Action Completion Report on February 12, 2021. A Completion of Waste Removal and Site Restoration was received on April 26, 2021. As all components of the RAW have been executed, we certified the remedy as complete and acknowledged that no further action is necessary at the Site.

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)

TOLUENE
XYLENES

Site History:

The PG&E Sacramento Site is a former manufactured gas plant that operated from 1873 to 1956 and produced gas from coal and petroleum as raw material. The site is currently paved to control soil migration and exposure. The site is located between Interstate 5 and the Sacramento River, near the former intersection of Front and T Streets in Sacramento. Major landmarks in the vicinity of the site are the Sacramento River, to the West, and Interstate 5, to the East, and the Towe Auto Museum, to the South. Currently the land is vacant and fenced. A groundwater extraction and treatment system (GWETS) is located on this site to address groundwater contamination, and there is a cap covering the site. A Land Use Covenant (LUC) was recorded on the property title in 1993. Continued operation of the GWETS located on the site to remove residual contaminants is required. Groundwater will be monitored to ensure contaminants above established limits are not migrating to the Ranney Collector. An Operation & Maintenance (O&M) agreement was executed between PG&E and DTSC (Enforceable Agreement Docket Number HAS-O&M 07/08-074) for the continued operation, maintenance and monitoring of the remedial systems at the site necessary to protect public health, and a financial assurance mechanism is in place.

PG&E completed a number of evaluations with the objective of identifying a remedy modification that will attain remedial goals sooner without the level of O&M currently required. Modification of the remedy is necessary as the Ranney Collector, a nearby large volume well was decommissioned in 2009. PG&E identified in-situ soil stabilization/solidification as a feasible remedy that could attain remedial Action Objectives. A draft Remedial Action Plan (RAP) was prepared and released for public comment from April 29 through May 31, 2011. Fact sheets were distributed and a public notice was published in the Sacramento Bee. A public meeting was held on May 18, 2011 at the Towe Auto Museum in Sacramento. The RAP proposed in-situ soil stabilization and solidification (ISSS) by the addition of Portland Cement and Activated carbon to the areas where the highest contamination is found in the vadose zone. The amendment of soil will decrease the leaching of PAHs and BTEX to the groundwater. The GWETS will continue to be operated until the removal action objectives are achieved. DTSC approved the RAP on June 30, 2011. DTSC conditionally approved the Revised Remedial Design/Remedial Action Implementation Plan (RDIP) on March 12. 2012. The RDIP was prepared by PG&E to provide details on the design and implementation of the remedy set forth in the DTSC approved RAP. The RAP fieldwork was conducted between March 20, 2012 and July 17, 2013. Approximately 60,000 cubic yards of soil were treated by ISSS followed by the installation of a low-permeable cap over the treated area. On November 17, 2014 DTSC approved the Remedial Activities Summary Report.

DTSC on April 13, 2015 approved revisions to the site-specific cleanup levels presented in the RAP based on changes to the state and federal toxicological and environmental screening values. In addition, PG&E requested, and DTSC approved, a request to shutdown the GWETS as the removal action objectives have been met, i.e., the upper tolerance limit (UTL) with a one-side 95 percent confidence limit for 95 percent coverage of at least eight consecutive data pointes collected in each of the compliance wells meets or falls below the site-specific cleanup levels. Following shutdown of the GWETS, the compliance monitoring plan requires quarterly sampling of the nine compliance wells until the 95/95 UTL of at least eight consecutive data points meets or falls below the cleanup levels. The GWETS was shut down on April 13, 2016.

PG&E conducted in the summer of 2016 a soil vapor evaluation as presented in the 20 November 2015 Soil Vapor Workplan approved by DTSC on November 20, 2015. The goal of the soil vapor investigation was to obtain information and soil vapor data to close data gaps sufficiently to evaluate the PG&E parcel for remedy certification/closure. As presented in the DTSC approved Final Soil Vapor Investigations Results Technical Memorandum, most of the detected vapor concentrations from the previous soil vapor investigation conducted in 2009 and the soil vapor investigation conducted in 2016 are below risk-based concentrations for commercial land use. However, residual soil impacts remain in the vadose zone requiring vapor mitigation measures be implemented if buildings or structures will be installed at the site.

DTSC on November 14, 2017 approved a revised O&M Plan for the project site. The O&M Plan was revised to consolidate under one document all O&M activities for the Front Street sites and to address changes to management of the project since the development of the original O&M documents in 2007 and 2010.

A revised LUC was signed by DTSC and PG&E in December of 2017 and filed with the County of Sacramento. The LUC was revised to reflect completion of the Remedial Action Plan, approved changes to the site-specific cleanup levels, the results of the 2016 soil vapor evaluation, and the revised O&M Plan.

Annual Compliance of LUC Inspections for 2022 has been completed. The next Annual Inspection Report is due Feb. 2024.

Title: Request for In-Situ Soil Solidification/Stabilization Modification
Title Link: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=34490048&doc_id=60309165
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Remedial Action Implementation Workplan
Date Completed: 9/12/2012
Comments: On this date, DTSC completed the formal review of a proposal to modify the remedial action for the subsurface soil. Rather than perform solidification and stabilization, the soil requiring treatment would only be solidified using Portland cement. DTSC also authorized the use of mixing using excavation equipment (bucket mixing). The treated material must comply with all other specifications in the RDIP.

Document Type: Treatability Study Report
Date Completed: 6/8/2010
Comments: The Treatability Study concludes that an admixture of 10% Portland cement and 4% granulated activated carbon will achieve the criteria set forth in the study. The study did not evaluate the contaminant capture over a range of mixtures. This is a data gap that will have to be addressed during the design phase should this remedy be selected for use at the site.

Sub Area Link:
Document Type: Treatability Study Workplan
Date Completed: 7/22/2009
Comments: On this date, DTSC approved the Treatability Study Plan for the in-situ soil stabilization/solidification. The objective of the study is to determine the proper stabilization mixture that will achieve the following:
• Permeability equal to, or less than, 1 x 10-6 centimeters per second;
• Unconfined compressive strength equal to or greater than, 30 pounds per square inch; and
• Reduce leaching of contaminants to groundwater to concentrations below target criteria.
Additionally, the study will qualitatively examine vapor generation, temperature increase during treatment, and encapsulation of non-aqueous phase liquids.

Document Type: Correspondence
Date Completed: 5/15/2012
Comments: On this date, (please note that the date of the letter was incorrect on the first page and correct on subsequent pages) DTSC conditionally approved the use of the alternate facility. The conditions were:

1) PG&E is responsible for the accuracy and completeness of the waste profile of the GCL;
2) PG&E is responsible for insuring that the transport of the material complies with the specifications presented in the RDIP;
3)In the event that the GCL is rejected upon arrival at Forward Landfill, PG&E is responsible for returning the GCL to the site and for the proper storage of the GCL until an alternate facility can be identified; and
4) PG&E is responsible for insuring that the transport of the GCL to Manteca is documented in the Green Remediation Evaluation which is included in the final report.

Document Type: Remedial Action Plan Amendment
Date Completed: 4/27/2011
Comments: DTSC approved the draft RAP for release on this date. The public comment period for the Draft RAP will commence on April 29, 2011 and will end on May 31, 2011. Fact sheets were mailed for delivery on the 29th and a public notice will be published on the 29th as well. A public meeting is scheduled for May 18 at the Towe Auto Museum in Sacramento. The Draft RAP proposes in-situ soil stabilization/solidification by the addition of Portland Cement and Activated carbon to the areas where the highest contamination is found in the vadose zone. The currently operating Groundwater remedy will continue to operate until RAOs are achieved. Modification of the remedy is necessary as the Ranney Collector, a nearby large volume well was decommissioned in 2009 and the contingent remedy was implemented.

Document Type: Removal Action Workplan
Date Completed: 4/27/2001
Comments: RAW- The public comment period for the Draft Final Groundwater Engineering Evaluation/Cost Analysis (EE/CA) and Remedial Action Work Plan (RAW) for the Front & T Street Sites, Sacramento CA for the Front Street Joint Defense Group (JDG) ended on April 3, 2001 DTSC received no comment on the above mentioned document and therefore granted final approval for said RAW. The RAW calls for a monitored natural attenuation (MNA) remedy combined with continued operation of the pump and treat system on PG&E Site. A contingent remedy, which will be implemented if Site conditions change, is also funded as a part of this RAW. Implementation of this RAW is designed to meet the groundwater cleanup objectives for all of the Front & T Street Sites. These Sites include: 1) PG&E Sacramento - Former MGP 2) CalTrans I-5, Q Street Offramp 3) SHRA - 1920 Front Street and 4) SMUD - Front and T Street.

Document Type: Removal Action Workplan Amendment
Date Completed: 1/4/2010
Comments: On July 29, 2009, DTSC requested that PG&E undertake examination of the remedy and evaluate the need for modification or enhancement. On September 11, 2209 the evaluation was presented with a recommendation that the currently operating GWETS be replaced. Rather than shut down the operating system, a replacement will be constructed on-site and placed in operation before the old system is decommissioned. This course of action was approved on this date.

Comments:	In a letter dated September 3, 2008 DTSC recieved a request for additional sampling to better meet the objectives presented in the Final Supplemental Soil Investigation Work Plan (Plan) dated March 28, 2008. Given that the collection of additional samples and data will refine the knowledge of the characteristics and volume of soil that requires further remediation, the additional work is hereby approved and incorporated into the Final Supplemental Soil Investigation Work Plan (Plan) dated March 28, 2008. The March 28 Plan was prepared for the Front & "T" Street Sites, Sacramento, California by ARCADIS for the Pacific Gas and Electric Company (PG&E).

Past Use that Caused Contam:	MANUFACTURED GAS PLANT		
Potential Media Affected:	OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL		
Site History:			

The PG&E Sacramento Site is a former manufactured gas plant that operated from 1873 to 1956 and produced gas from coal and petroleum as raw material. The site is currently paved to control soil migration and exposure. The site is located between Interstate 5 and the Sacramento River, near the former intersection of Front and T Streets in Sacramento. Major landmarks in the vicinity of the site are the Sacramento River, to the West, and Interstate 5, to the East, and the Towe Auto Museum, to the South. Currently the land is vacant and fenced. A groundwater extraction and treatment system (GWETS) is located on this site to address groundwater contamination, and there is a cap covering the site. A Land Use Covenant (LUC) was recorded on the property title in 1993. Continued operation of the GWETS located on the site to remove residual contaminants is required. Groundwater will be monitored to ensure contaminants above established limits are not migrating to the Ranney Collector. An Operation & Maintenance (O&M) agreement was executed between PG&E and DTSC (Enforceable Agreement Docket Number HAS-O&M 07/08-074) for the continued operation, maintenance and monitoring of the remedial systems at the site necessary to protect public health, and a financial assurance mechanism is in place.

PG&E completed a number of evaluations with the objective of identifying a remedy modification that will attain remedial goals sooner without the level of O&M currently required. Modification of the remedy is necessary as the Ranney Collector, a nearby large volume well was decommissioned in 2009. PG&E identified in-situ soil stabilization/solidification as a feasible remedy that could attain remedial Action Objectives. A draft Remedial Action Plan (RAP) was prepared and released for public comment from April 29 through May 31, 2011. Fact sheets were distributed and a public notice was published in the Sacramento Bee. A public meeting was held on May 18, 2011 at the Towe Auto Museum in Sacramento. The RAP proposed in-situ soil stabilization and solidification (ISSS) by the addition of Portland Cement and Activated carbon to the areas where the highest contamination is found in the vadose zone. The amendment of soil will decrease the leaching of PAHs and BTEX to the groundwater. The GWETS will continue to be operated until the removal action objectives are achieved. DTSC approved the RAP on June 30, 2011. DTSC conditionally approved the Revised Remedial Design/Remedial Action Implementation Plan (RDIP) on March 12. 2012. The RDIP was prepared by PG&E to provide details on the design and implementation of the remedy set forth in the DTSC approved RAP. The RAP fieldwork was conducted between March 20, 2012 and July 17, 2013. Approximately 60,000 cubic yards of soil were treated by ISSS followed by the installation of a low-permeable cap over the treated area. On November 17, 2014 DTSC approved the Remedial Activities Summary Report.

DTSC on April 13, 2015 approved revisions to the site-specific cleanup levels presented in the RAP based on changes to the state and federal toxicological and environmental screening values. In addition, PG&E requested, and DTSC approved, a request to shutdown the GWETS as the removal action objectives have been met, i.e., the upper tolerance limit (UTL) with a one-side 95 percent confidence limit for 95 percent coverage of at least eight consecutive data pointes collected in each of the compliance wells meets or falls below the site-specific cleanup levels. Following shutdown of the GWETS, the compliance monitoring plan requires quarterly sampling of the nine compliance wells until the 95/95 UTL of at least eight consecutive

data points meets or falls below the cleanup levels. The GWETS was shut down on April 13, 2016.

PG&E conducted in the summer of 2016 a soil vapor evaluation as presented in the 20 November 2015 Soil Vapor Workplan approved by DTSC on November 20, 2015. The goal of the soil vapor investigation was to obtain information and soil vapor data to close data gaps sufficiently to evaluate the PG&E parcel for remedy certification/closure. As presented in the DTSC approved Final Soil Vapor Investigations Results Technical Memorandum, most of the detected vapor concentrations from the previous soil vapor investigation conducted in 2009 and the soil vapor investigation conducted in 2016 are below risk-based concentrations for commercial land use. However, residual soil impacts remain in the vadose zone requiring vapor mitigation measures be implemented if buildings or structures will be installed at the site.

DTSC on November 14, 2017 approved a revised O&M Plan for the project site. The O&M Plan was revised to consolidate under one document all O&M activities for the Front Street sites and to address changes to management of the project since the development of the original O&M documents in 2007 and 2010.

A revised LUC was signed by DTSC and PG&E in December of 2017 and filed with the County of Sacramento. The LUC was revised to reflect completion of the Remedial Action Plan, approved changes to the site-specific cleanup levels, the results of the 2016 soil vapor evaluation, and the revised O&M Plan.

Annual Compliance of LUC Inspections for 2022 has been completed. The next Annual Inspection Report is due Feb. 2024.

Document Type: Removal Action Workplan Amendment
Date Completed: 1/4/2010
Comments: On July 29, 2009, DTSC requested that PG&E undertake examination of the remedy and evaluate the need for modification or enhancement. On September 11, 2209 the evaluation was presented with a recommendation that the currently operating GWETS be replaced. Rather than shut down the operating system, a replacement will be constructed on-site and placed in operation before the old system is decommissioned. This course of action was approved on this date.

Document Type: Treatability Study Workplan
Date Completed: 7/22/2009
Comments: On this date, DTSC approved the Treatability Study Plan for the in-situ soil stabilization/solidification. The objective of the study is to determine the proper stabilization mixture that will achieve the following:
• Permeability equal to, or less than, 1 x 10-6 centimeters per second;
• Unconfined compressive strength equal to or greater than, 30 pounds per square inch; and
• Reduce leaching of contaminants to groundwater to concentrations below target criteria.
Additionally, the study will qualitatively examine vapor generation, temperature increase during treatment, and encapsulation of non-aqueous phase liquids.

Date Completed: 5/15/2012
Comments: On this date, (please note that the date of the letter was incorrect on the first page and correct on subsequent pages) DTSC conditionally approved the use of the alternate facility. The conditions were:
1) PG&E is responsible for the accuracy and completeness of the waste profile of the GCL;
2) PG&E is responsible for insuring that the transport of the material complies with the specifications presented in the RDIP;
3)In the event that the GCL is rejected upon arrival at Forward Landfill, PG&E is responsible for returning the GCL to the site and for the proper storage of the GCL until an alternate facility can be identified; and
4) PG&E is responsible for insuring that the transport of the GCL to Manteca is documented in the Green Remediation Evaluation which is included in the final report.

Document Type: Removal Action Workplan
Date Completed: 4/27/2001
Comments: RAW- The public comment period for the Draft Final Groundwater Engineering Evaluation/Cost Analysis (EE/CA) and Remedial Action Work Plan (RAW) for the Front & T Street Sites, Sacramento CA for the Front Street Joint Defense Group (JDG) ended on April 3, 2001 DTSC received no comment on the above mentioned document and therefore granted final approval for said RAW. The RAW calls for a monitored natural attenuation (MNA) remedy combined with continued operation of the pump and treat system on PG&E Site. A contingent remedy, which will be implemented if Site conditions change, is also funded as a part of this RAW. Implementation of this RAW is designed to meet the groundwater cleanup objectives for all of the Front & T Street Sites. These Sites include: 1) PG&E Sacramento - Former MGP 2) CalTrans I-5, Q Street Offramp 3) SHRA - 1920 Front Street and 4) SMUD - Front and T Street.

Date Completed: 9/3/2008
Comments: In a letter dated September 3, 2008 DTSC recieved a request for additional sampling to better meet the objectives presented in the Final Supplemental Soil Investigation Work Plan (Plan) dated March 28, 2008. Given that the collection of additional samples and data will refine the knowledge of the characteristics and volume of soil that requires further remediation, the additional work is hereby approved and incorporated into the Final Supplemental Soil Investigation Work Plan (Plan) dated March 28, 2008. The March 28 Plan was prepared for the Front & "T" Street Sites, Sacramento, California by ARCADIS for the Pacific Gas and Electric Company (PG&E).

Sub Area Link:
Document Type: Remedial Action Plan Amendment
Date Completed: 4/27/2011
Comments: DTSC approved the draft RAP for release on this date. The public comment period for the Draft RAP will commence on April 29, 2011 and will end on May 31, 2011. Fact sheets were mailed for delivery on the 29th and a public notice will be published on the 29th as well. A public meeting is scheduled for May 18 at the Towe Auto Museum in Sacramento. The Draft RAP proposes in-situ soil stabilization/solidification by the addition of Portland Cement and Activated carbon to the areas where the highest contamination is found in the vadose zone. The currently operating Groundwater remedy will continue to operate until RAOs are achieved. Modification of the remedy is necessary as the Ranney Collector, a nearby large volume well was decommissioned in 2009 and the contingent remedy was implemented.

Past Use that Caused Contam: FUEL - VEHICLE STORAGE/ REFUELING, MANUFACTURED GAS PLANT, MANUFACTURING - LUMBER/WOOD PRODUCTS
Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL
Potential Contamin of Concern:

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)
TPH-GAS
VOLATILE ORGANICS (8260B VOCS)

Site History:

The Sacramento Housing and Redevelopment Agency (SHRA) site is located at 1920 Front Street in Sacramento. The site is located adjacent to the PG&E former manufactured gas plant (MGP). The historical uses include a cardboard box company and a lumber yard. Contamination was found at two areas on the site. The first area was in the southeast portion of the site. Currently, the land is utilized for a "parking area" for the horse drawn carriages associated with the Old Town District. Major landmarks in the vicinity of the site are the Sacramento River, to the West, and Interstate 5, to the East, and the Towe Auto Museum, to the South.
A leaking underground storage tank was removed from the first area in 1988 and contaminated soils were removed during December 1996. MGP residues, from the PG&E site, located immediately south of the site, were deposited in a limited area. Approximately 700 cubic yards of polycyclic aromatic hydrocarbon contaminated soil was removed from this area in November 2001. The sampling and assessment of the site revealed limited areas where contamination was of concern. A Land Use Covenant was recorded on the property in 2006.
The remedy at this site has multiple components:
Groundwater: Continued operation of the GWETs located on the PG&E Sacramento site to remove residual amounts of Site contaminants. Continued groundwater monitoring to ensure contaminant migration above established limits is not migrating to the Ranney Collector.
Institutional Control: Recordation of an LUC to provide for the continued operation of the GWETs, associated monitoring wells, and prohibits certain uses of the Site.
Operation & Maintenance: An O&M agreement for this site (Enforceable Agreement Docket Number HAS-O&M 07/08-074) for the continued operation, maintenance and monitoring of the remedial systems necessary to protect public health has been executed and an assurance mechanism is in place.

On April 30, 2008 DTSC completed the certification process and found that the Site should be deleted from the "active" site list. However, the site will be placed on the list of sites undergoing O&M to ensure proper monitoring of long-term clean-up efforts and adherence to the LUC. The certification was based on the fact that DTSC determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing O&M. Annual Inspections have been on-going.

All Annual Inspection documents for this site are presented in the EnviroStor PG&E Sacramento Site at

Date Completed: 4/27/2001
Comments: RAW - The public comment period for the Draft Final Groundwater Engineering Evaluation/Cost Analysis (EE/CA) and Remedial Action Work Plan (RAW) for the Front & T Street Sites, Sacramento California for the Front Street

Joint Defense Group (JDG) ended on April 3, 2001. Department of Toxic Substances Control (DTSC) received no comment on the above mentioned document and therefore granted final approval for said RAW. The RAW calls for a monitored natural attenuation (MNA) remedy combined with continued operation of the pump and treat system on PG&E Site. A contingent remedy, which will be implemented if Site conditions change, is also funded as a part of this RAW. Implementation of this RAW is designed to meet the groundwater cleanup objectives for all of the Front & T Street Sites. These sites include: 1) PG&E Sacramento - Former MGP 2) Cal Trans I-5, Q Street Off-ramp 3) SHRA - 1920 Front Street and 4) SMUD - Front and T Street.

VOLATILE ORGANICS (8260B VOCS)

Site History:

The Sacramento Housing and Redevelopment Agency (SHRA) site is located at 1920 Front Street in Sacramento. The site is located adjacent to the PG&E former manufactured gas plant (MGP). The historical uses include a cardboard box company and a lumber yard. Contamination was found at two areas on the site. The first area was in the southeast portion of the site. Currently, the land is utilized for a "parking area" for the horse drawn carriages associated with the Old Town District. Major landmarks in the vicinity of the site are the Sacramento River, to the West, and Interstate 5, to the East, and the Towe Auto Museum, to the South.
A leaking underground storage tank was removed from the first area in 1988 and contaminated soils were removed during December 1996. MGP residues, from the PG&E site, located immediately south of the site, were deposited in a limited area. Approximately 700 cubic yards of polycyclic aromatic hydrocarbon contaminated soil was removed from this area in November 2001. The sampling and assessment of the site revealed limited areas where contamination was of concern. A Land Use Covenant was recorded on the property in 2006.
The remedy at this site has multiple components:
Groundwater: Continued operation of the GWETs located on the PG&E Sacramento site to remove residual amounts of Site contaminants. Continued groundwater monitoring to ensure contaminant migration above established limits is not migrating to the Ranney Collector.
Institutional Control: Recordation of an LUC to provide for the continued operation of the GWETs, associated monitoring wells, and prohibits certain uses of the Site.
Operation & Maintenance: An O&M agreement for this site (Enforceable Agreement Docket Number HAS-O&M 07/08-074) for the continued operation, maintenance and monitoring of the remedial systems necessary to protect public health has been executed and an assurance mechanism is in place.

On April 30, 2008 DTSC completed the certification process and found that the Site should be deleted from the "active" site list. However, the site will be placed on the list of sites undergoing O&M to ensure proper monitoring of long-term clean-up efforts and adherence to the LUC. The certification was based on the fact that DTSC determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing O&M. Annual Inspections have been on-going.

All Annual Inspection documents for this site are presented in the EnviroStor PG&E Sacramento Site at

Potential Contamin of Concern:

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)
TPH-GAS
VOLATILE ORGANICS (8260B VOCS)

Site History:

The Sacramento Municipal Utility District (SMUD) Site is located near the former intersection of Front and T Streets in Sacramento and adjacent to the California Department of Transportation (CalTrans) property. The site was discovered during the groundwater investigation for the PG&E-Sacramento site. Historical uses of the property include vehicle maintenance, fueling and storage. Major landmarks in the vicinity of the site are the Sacramento River, to the West, and Interstate 5, to the East, and the Towe Auto Museum, to the South.
Currently, the land is a vacant parcel that lies between the Interstate 5 freeway and the Q Street Off-ramp. The groundwater investigation revealed that the site was a source of contaminants which were migrating to the groundwater. In 1999, the source of contamination was excavated and disposed off-site. A seasonal soil vapor extraction system has operated at the site since November of 1999. In 2006, the Department authorized the decommissioning of the system as it is no longer removes site contaminants due to decrease levels and fluctuations in the groundwater depth. The remaining contamination is being addressed by a Groundwater Extraction and Treatment System. The groundwater investigation revealed that the site

was a source of contaminants which were migrating to the groundwater. Operation and Maintenance (O&M)Plans were developed as well as an O&M Agreement completed.
The remedy at this site has multiple components:
Soil: Excavation of 4,290 tons of contaminated soil. The excavation encompassed the Site and the adjacent CalTrans Site.
Groundwater: Removal of contaminants from the vadose zone by the SVETs which operated at the Site from November of 1999 through May of 2007. The SVETs is estimated to have captured and treated 34 pounds of reactive organic compounds and 13 pounds of benzene. The majority of the mass removal occurred during the first four years of operation.
Continued operation of the GWETs located on the PG&E Sacramento site to remove residual amounts of Site contaminants. Continued groundwater monitoring to ensure contaminant migration above established limits is not migrating to the Ranney Collector.
Institutional Control: Recordation of an LUC to provide for the continued operation of the GWETs, associated monitoring wells, and prohibits certain uses of the Site.
Operation & Maintenance: An O&M agreement for this site (Enforceable Agreement Docket Number HAS-O&M 07/08-074) for the continued operation, maintenance and monitoring of the remedial systems necessary to protect public health has been executed and an assurance mechanism is in place.

On April 30, 2008 DTSC completed the certification process and found that the Site should be deleted from the "active" site list. However, the site will be placed on the list of sites undergoing O&M to ensure proper monitoring of long-term clean-up efforts. The certification was based on the fact that DTSC determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented; however, the site requires and LUC and ongoing O&M.

Annual Inspections are performed in conjunction with PG&E Sacramento Site. Recent inspections can be found here:

Date Completed: 4/27/2001
Comments: RAW - The pubilc comment period for the Draft Final Groundwater Engineering Evaluation/Cost Analysis (EE/CA) and Remedial Action Work Plan (RAW) for the Front & T Street sites, Sacramento, California for the Front Street Joint Defense Group (JDG) ended on April 3, 2001. DTSC received no comment on the above mentioned document and therefore granted final approval for said RAW. The RAW calls for a monitored natural attenuation (MNA) remedy combined with continued operation of the pump and treat system on PG&E site. A contingent remedy, which will be implemented if Site conditions change, is also funded as a part of this RAW. Implementation of this RAW is designed to meet the groundwater cleanup objectives for all of the Front & T Street sites. These sites include: 1) PG&E Sacramento- Former MGP 2) CalTrans I-5, Q Street Off-ramp 3) SHRA - 1920 Front Street and 4) SMUD - Front and T Street.

TPH-GAS
VOLATILE ORGANICS (8260B VOCS)

Site History:

The Sacramento Municipal Utility District (SMUD) Site is located near the former intersection of Front and T Streets in Sacramento and adjacent to the California Department of Transportation (CalTrans) property. The site was discovered during the groundwater investigation for the PG&E-Sacramento site. Historical uses of the property include vehicle maintenance, fueling and storage. Major landmarks in the vicinity of the site are the Sacramento River, to the West, and Interstate 5, to the East, and the Towe Auto Museum, to the South.
Currently, the land is a vacant parcel that lies between the Interstate 5 freeway and the Q Street Off-ramp. The groundwater investigation revealed that the site was a source of contaminants which were migrating to the groundwater. In 1999, the source of contamination was excavated and disposed off-

site. A seasonal soil vapor extraction system has operated at the site since November of 1999. In 2006, the Department authorized the decommissioning of the system as it is no longer removes site contaminants due to decrease levels and fluctuations in the groundwater depth. The remaining contamination is being addressed by a Groundwater Extraction and Treatment System. The groundwater investigation revealed that the site was a source of contaminants which were migrating to the groundwater. Operation and Maintenance (O&M)Plans were developed as well as an O&M Agreement completed.
The remedy at this site has multiple components:
Soil: Excavation of 4,290 tons of contaminated soil. The excavation encompassed the Site and the adjacent CalTrans Site.
Groundwater: Removal of contaminants from the vadose zone by the SVETs which operated at the Site from November of 1999 through May of 2007. The SVETs is estimated to have captured and treated 34 pounds of reactive organic compounds and 13 pounds of benzene. The majority of the mass removal occurred during the first four years of operation.
Continued operation of the GWETs located on the PG&E Sacramento site to remove residual amounts of Site contaminants. Continued groundwater monitoring to ensure contaminant migration above established limits is not migrating to the Ranney Collector.
Institutional Control: Recordation of an LUC to provide for the continued operation of the GWETs, associated monitoring wells, and prohibits certain uses of the Site.
Operation & Maintenance: An O&M agreement for this site (Enforceable Agreement Docket Number HAS-O&M 07/08-074) for the continued operation, maintenance and monitoring of the remedial systems necessary to protect public health has been executed and an assurance mechanism is in place.

On April 30, 2008 DTSC completed the certification process and found that the Site should be deleted from the "active" site list. However, the site will be placed on the list of sites undergoing O&M to ensure proper monitoring of long-term clean-up efforts. The certification was based on the fact that DTSC determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented; however, the site requires and LUC and ongoing O&M.

Annual Inspections are performed in conjunction with PG&E Sacramento Site. Recent inspections can be found here:

Potential Contamin of Concern:

UNDER INVESTIGATION

Site History:

The 20 acre Docks Area Site is located on the City of Sacramento Riverfront, Sacramento County, California. Portions of the Site have been used for industrial purposes since approximately 1873 and historical documentation indicates the potential presence of fuels, oils and possibly metals in soils and groundwater. DTSC and the Redevelopment Agency of the City of Sacramento entered into an EOA to cooperatively conduct further assessment of the property's condition and suitability for future residential, recreational, and commercial development. DTSC's oversight of the project concluded in

December 2009.

Based on the risk assessment, DTSC made the following four conclusions regarding future constraints for the site:

1. Extraction of groundwater beneath the PG&E and SHRA parcels is prohibited.

2. No native soil from the Site shall be placed in contact with future residents, commercial or industrial workers, or recreation receptors. The cap installed at the PG&E parcel currently prevents direct contact to soil in this area. Preventing direct contact to soil in the remaining portions of the Site shall be accomplished by installation of improvements, such as buildings, roads, and sidewalks, filling in open space areas with parks and landscaping, or by providing a minimum three foot cover layer of clean fill material.

3. Risk reduction practices shall be employed by construction, municipal utility and landscape workers when working in isolated areas of the Site with elevated benzo(a)pyrene concentrations present in soil.

4. In the event that the City of Sacramento acquires the PG&E parcel and attains DTSC approval for the modification of the existing Land Use Covenant, the construction of slab-on-grade buildings for either residential and, or commercial purposes shall be prohibited on the soil and groundwater "hot spot" areas surrounding monitoring wells 17 and 18.

DTSC also made the following five comments and recommendations:

1. DTSC is satisfied with the J&E modeling used to estimate potential indoor air from concentrations of volatile organic compounds (VOC's) under the proposed slab-on- grade and subterranean garage scenarios.

2. DTSC does not recommend utilizing the J&E model for podium style buildings due to the open air between the soil and the enclosed building spaces. In accordance with DTSC's Vapor Intrusion Mitigation Advisory, dated April 2009, the potential risk posed from vapor intrusion may be greatly reduced by implementation of podium building designs. However, all potential vapor conduits to upper floors of the podium building (particularly utility lines, elevator shafts, and ventilation systems) must be engineered and sealed in a manner that reduces the risk of vapor intrusion. Please refer to DTSC's Vapor Intrusion Mitigation Advisory located at the following website:
http://www.dtsc.ca.gov/SiteCleanup/upload/VI Mitigation Advisory Apr09r.pdf
(updated document as of May 2022: https://dtsc.ca.gov/wp-content/uploads/sites/31/2016/01/VIMA_Final_Oct_20111.pdf)

3. DTSC concurs that the modeled cumulative potential cancer risk and hazard index for vapor intrusion into future buildings with subterranean garages is within acceptable limits for both residential and commercial use.

4. DTSC recommends that protective measures (i.e., engineering controls) be implemented, as appropriate, in the event that future changes are made to the current redevelopment design plans. As stated in Section 8, and in Table 15A of the HHRA, the J&E modeling demonstrated that the cumulative potential cancer risk due to vapor intrusion in slab-on-grade residential buildings in the hot spot area is 2X10-4, which exceeds the risk management range (1X10-6 to 1X10-4), thereby requiring mitigation and/or remediation.

5. DTSC requests that no existing soil from the PG&E or SHRA parcels be moved without a DTSC approved soil management plan.

LEAD

SITE HISTORY:

The Washington Unified School District is proposing to construct on approximately 2.5-acres in the central section of the existing Elkhorn Village Elementary School and joint-use Elkhorn Park, which equals approximately 10.5-acres (APN 014-630-012-1). The new construction will consist of new classrooms, a library/computer lab building and a gymnasium. Currently, the Site consists of three portable buildings, asphalt play areas, and grass/shrubs/tree areas. The school was built before 1952 and prior to that the site may have been used for minimal agricultural farming. Sampling was conducted for lead from lead based paint and organochlorine pesticides(OCPs) from termiticide application following DTSC's guidance. A low area was also sampled for lead from runoff. In addition, there are sampling activities being conducted at another location on the campus that is not being overseen by DTSC. The site sample results had minor detection that were below screening levels. Arsenic was detected a low levels in samples from the off-site area that dispel concerns regarding potential past use of arsenical pesticide use. The Phase 1 recommends a no action for this site.

The Phase I sample results do not indicate that the site has been significantly impacted. On March 12, 2008, DTSC approved the Phase I with a no action determination.

METALS
ORGANOCHLORINE PESTICIDES (8081 OCPS)
UNDER INVESTIGATION

Site History:

According to the Phase I, the Washington Unified School District (District) is proposing to construct two classroom wings and complete modernization of the existing Westmore
Oaks Elementary School campus, also referred to as the Early College Prep or Middle College High Charter School. The Site is designated as 9.46-acres of Yolo County Assessor's Office as Assessor's Parcel Number 058-220-043-000. Most of the existing Westmore Oaks Elementary School buildings were proposed for demolition in June 2021 following transfer of students to the new facilities. The existing and new facilities are designed for

35 classrooms to accommodate up to 863 students.

The Site was undeveloped land from at least 1937 through 1947. In 1953, the main school building and two classroom buildings had been constructed in the northeast portion of the Site. By 1957, a third classroom building had been constructed west of the main building. By 1964, a fourth classroom building had been constructed south of the classroom buildings and southwest of the main building. The Site remained relatively unchanged between 1966 and 1984. Between 1984 and 1993, a portable building was present to the south of the classroom buildings. Between 1993 and 1998, additional portable buildings were present to the south of the classroom buildings. By 2002, several portable buildings are visible on the blacktop court to the southeast of the main building. The configuration of the portable buildings is reported to have varied through the years. By 2015, all the portable buildings from the blacktop court to the southeast of the main building are no longer present.

The Site is bordered to the north by Grande Vista Avenue followed by single-family residential developments; to the east by Fallbrook Street followed by single-family residential developments; to the south by Lakewood Drive followed by single-family residential developments; and to the west by single-family residential development.

The Phase I did not identify any recognized environmental conditions (RECs), controlled RECs, historical RECs or Vapor Encroachment Conditions in connection with the Site. De Minimis environmental conditions were also not noted for the Site. However, the Phase I did identify the potential presence of residual pesticides in soil from direct application of termiticides around the perimeters of building structures, potential for the presence of residual lead in soil from the weathering of lead-based paint from building structures, and the potential for the presence of residual polychlorinated biphenyls (PCBs) in soil from pole-mounted electrical transformers.

On Aug 9, 2021, DTSC received advance payment for Phase I document reviews. The Phase I was provide via email on Jul 26, 2021. On Aug 9, 2021, DTSC issued comments on the Phase I during project coordination video conference call. On Aug 10, 2021, DTSC received a revised Phase I. On Aug 10, 2021, DTSC issued follow-up comments via an email on the proposed revisions to the Phase I. On Aug 11, 2021, DTSC received an ecopy of the final Phase I. On Aug 10, 2021, DTSC issued a Phase I Addendum required determination.

MERCURY AND COMPOUNDS
POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)

Site History:

A Preliminary Assessment completed by the Pacific Gas and Electric Company (PG&E) in 1986 states that a gas plant operated at the south edge of Broadway on the Sacramento River from 1914 until 1926. The plant was constructed by the Sacramento Gas Company which supplied both natural and manufactured gas to its customers. The facility used oil delivered by ship to manufacture its gas. PG&E purchased the plant in 1926. The plant was dismantled in 1926-1927 and PG&E supplied gas from its other manufactured gas plants in Sacramento. The site is currently occupied by oil storage tanks.

Site History:

The Southern Pacific Transportation Company's (SPTCo) Sacramento Railyard Facility has been in operation since 1865. The site is approximately 240 acres. Inorganic and organic contamination are broadly distributed across a majority of the site. On June 2, 1988, the Department and SPTCo entered into an Enforceable Agreement. A workplan and schedule for investigation and cleanup was finalized in October of 1988. Based on historical usage and known contamination the site was divided into Study Areas: Central Shops, Central Corridor, Car Shop Nine, Lagoon, Northern Shops, Sacramento Station, Manufactured Gas Plant, South Plume, and Lagoon Groundwater.

A new area was added in 2003, entitled the Manufactured Gas Plant (MGP) Study Area, which was established after discovering remnants of an MGP on the western boundary of the northern shops area during soil remediation activities in the Northern Shops. The former MGP was in operation during the late 1800's. Soil and groundwater are both impacted. Soil contamination includes metals, TPH, Volatile Organic Compounds with the highest concentrations detected of benzene, and Semi Volatile Organic Compounds primarily consisting of napththalene and B(a)P. Groundwater COCs include benzene, napththlene, B(a)P and TPH. The former MGP Study Area occupies approximately 1.5 acres.

The Feasibility Study was approved on 5/31/2022. Six remedial alternatives were evaluated for the former MGP Study Area and are detailed in the draft Remedial Action Plan (RAP). The proposed cleanup alternative selected is Alternative 6B: Cap, Expanded In-Situ Soil Stabilization/Solidification, Groundwater Extraction for Residual Mass Removal, Non-aqueous Phase Liquid Recovery Management. The draft RAP is set to undergo public review and comment.

Site History:

West Sac Rivers, LLC submitted a VCA Application for the development of a charter school. The 7-acre Site was used as low-income housing from 1960-2002 and, potentially, during that time chlordane was applied to the housing units. Recent soil samples indicate chlordane remains in the top 18 inches of the soil in certain areas of the Site.

UPR is a former RCRA facility that was transferred to the Site Mitigation and Restoration (SMR) program for closure in 1988. UPR submitted a Part A application on August 5, 1983. It was not clear from the Part A, what RCRA unit existed at the site. Based on internal memo from Permitting dated March 15, 2006, HWMU 1 industrial wastewater treatment system also known as the Pond and Ditch was the only RCRA hazardous management unit designated on the site. Other units were designated as Solid Waste Management Units.

UPR never received interim status or applied for a permit. On August 5, 1983 the facility submitted the part A permit application. This facility was transferred to Site Cleanup Program in June 1988 via Enforcement Agreement. Contaminated soil for the Pond and Ditch unit was removed and certified on 1/12/96 by SMP. . Since then, associated groundwater impacts continue to be addressed along with the remaining cleanup for the Sacramento Yard (now referred to as the "Sacramento Railyards" Site). O&M agreement is expected to be completed to conduct GW monitoring and will be updated.

Potential Contaminants of Concern:

TPH-DIESEL

Site History:

On November 19, 1981 the facility submitted the part A permit application and later was determined by DTSC that they did not need to file (protective filer). This facility was transferred to SMP. Contaminated soil was removed and certified on 6/21/1994 by SMP. There is a GW monitoring is in place based on O/M order dated 6/30/94. Same as UP Sac - Sacramento Station site.

--

Update 9/18/2019 RC:

The former Southern Pacific Transportation Company (SPTCo) Sacramento Railyard Facility is an approximately 240 acre site that was the location of major railroad operation and maintenance facility from 1865 until the 1990s. Heavy industrial activities at the site resulted in the release of contamination across a majority of the parcel, including both organic and metals contaminants. In the early 1980s, the US EPA and State of California began initial environmental investigations and incorporated the site into several regulatory cleanup programs. In June 1988, the Department and SPTCo entered into an Enforceable Agreement for investigation and cleanup of the site. DTSC's Site Mitigation Program became the lead agency for regulatory oversight of environmental cleanup, with major involvement of the US EPA and the Central Valley Regional Water Quality Control Board (RWQCB). Union Pacific Railroad Company (UPRR) acquired the property from SPTCo and is the responsible party for investigation and cleanup. Based on historical usage and known contamination, the site was divided into study areas: Central Shops, Central Corridor, Car Shop Nine, Lagoon, Northern Shops, Sacramento Station, Manufactured Gas Plant, South Plume, and Lagoon Groundwater. [Search "UP, DOWNTOWN SAC" on EnviroStor to see list of study areas.]

Soil contamination includes metals, Volatile Organic Compounds (VOCs), Semi Volatile Organic Compounds (SVOCs) including Poly Nuclear Aromatics (PAHs), and Total Petroleum Hydrocarbons (TPH). Groundwater contamination includes metals, VOCs, SVOCs, and TPH. Approximately 500,000 tons of impacted soil has been removed from the site so far. The groundwater impacts consist of both onsite and offsite contaminant plumes. A significant dissolved phase chlorinated VOC plume extends offsite to the south, beneath downtown Sacramento to approximately P Street. Impacted groundwater is being actively pumped and treated both onsite and near the southern terminus of the plume, at a rate of approximately 400,000 gallons a day. Onsite Soil Vapor Extraction (SVE) of the major VOC source areas is also ongoing.

Site History:

UPR is a former RCRA facility that was transferred to the Site Mitigation and Restoration (SMR) program for closure in 1988. UPR submitted a Part A application on August 5, 1983. It was not clear from the Part A, what RCRA unit existed at the site. Based on internal memo from Permitting dated March 15, 2006, HWMU 1 industrial wastewater treatment system also known as the Pond and Ditch was the only RCRA hazardous management unit designated on the site. Other units were designated as Solid Waste Management Units.

UPR never received interim status or applied for a permit. On August 5, 1983 the facility submitted the part A permit application. This facility was transferred to Site Cleanup Program in June 1988 via Enforcement Agreement. Contaminated soil for the Pond and Ditch unit was removed and certified on 1/12/96 by SMP. . Since then, associated groundwater impacts continue to be addressed along with the remaining cleanup for the Sacramento Yard (now referred to as the "Sacramento Railyards" Site). O&M agreement is expected to be completed to conduct GW monitoring and will be updated.

Site History:

The West Sac Rivers, LLC (Developer) plans to transfer ownership of the approximately 7-acre proposed new public charter elementary school property to the charter school following completion of the response action and site certification. The proposed new public charter elementary school property is identified by the Yolo County Assessor Office as Assessor's Parcel Numbers 014-630-06 (approximately 3.59 acres) and 014-760-28 (approximately 3.4 acres of a larger parcel), located at the northwest corner of Lighthouse Drive and Fountain Drive, West Sacramento, Yolo County, California (Site). The proposed new public charter elementary school will be designed to accommodate 196 students in five classrooms. Potable water and sewer services will be provided to the Site by the City of West Sacramento municipality.

In October 2005, the Washington Unified School District (District) entered into an Environmental Oversight Agreement (EOA) with DTSC for oversight of environmental investigation activities associated with a larger 12-acre site proposed for a K–8 Fundamental Academy school. Under the EOA, a PEA Workplan (Geocon Consultants, Inc., January 11, 2006) was approved by DTSC on January 30, 2006. However, at the request of the District, the project was dropped on April 17, 2006. On November 23, 2015, the Developer requested reactivation of the project and submitted a completed Voluntary Cleanup Agreement application for a proposed new charter school. Based on the application, the boundaries of the Site have been reduced to include 7-acres of the originally proposed 12-acre K–8 Fundamental Academy school site. In addition, the proponent for the project has changed from the District to the Developer. The project name has changed from the "Proposed K-8 Fundamental Academy" to "The Rivers Phase II Proposed School".

Documents created for this project include:

• Phase I Environmental Site Assessment, Lighthouse Golf Course and Country Club (Kleinfelder, Inc., January 17, 2003);
• Phase I Environmental Site Assessment, Supplement No. 1, Three additional parcels and receipt of additional information, Lighthouse Development (Kleinfelder, Inc., March 13, 2003);
• Proposed K-8 School Facility at the Rivers, Fountain and Lighthouse Drives, West Sacramento, California, Limited Soil Sampling Summary Report (Geocon, Inc., May 10, 2005);
• Revised Workplan for Preliminary Endangerment Assessment, Proposed K-8 School Facility at the Rivers, Fountain and Lighthouse Drives (Geocon, Inc., January 2006);
• Phase I Environmental Site Assessment, West Riverview: Waldorf School Site (Wallace-Kuhl Associates, November 6, 2008);
• Soil Sampling and Analytical Testing (Engeo Incorporated, 2014)
• Soil Sampling and Analytical Testing (Engeo Incorporated, 2015)
• Phase I Environmental Site Assessment Update, The Rivers Phase II Proposed School Site (Engeo Incorporated, March 25, 2016);
• Preliminary Endangerment Assessment Equivalent Report (Engeo Incorporated, March 30, 2016);

• Removal Action Workplan, The Rivers Phase II Proposed School (Engeo Incorporated, September 20, 2016)
• Removal Action Completion Report, The Rivers Phase II Proposed School (Engeo Incorporated, November 26, 2018)

Historically, the Site was used for agricultural purposes, including an orchard pre-1940s and a pasture (hay, and/or small grain production) in the 1940s to 1960s. In 1963, the Yolo County Housing Authority constructed 13 housing units on the southern portion of the Site. This area reportedly received 2 to 9 feet of fill material (likely dredged river sediments from the Sacramento River) prior to 1963. The housing units were demolished in 2001. An ephemeral drainage separates the former Lighthouse Golf and Country Club and the Site. The Site is currently vacant with remnant asphalt paving remaining in the area of the former housing and parking areas.

The Site is bordered to the north by the former Lighthouse Golf and Country Club followed by single family residential subdivisions and the Sacramento River; to the east by Fountain Drive followed by vacant land, Levee Road, Yolo Park and the Sacramento River; to the south by Lighthouse Drive followed by single family residential subdivisions; and to the west by Riverbend Country Club Apartments.

From 2003 through 2016 the Site was investigated for the following recognized environmental conditions that may pose a threat to human health and/or the environment:

• OCPs and arsenic in soil from historic agricultural use;
• lead in soil from weathering of lead-based paint used from historic on-site structures; and termiticides in soil from historic structures;
• Petroleum hydrocarbons and related volatile organic compounds in the area of a former underground storage tank; and,
• polychlorinated biphenyls, OCPs, and metals to assess fill material.

The results of the PEA screening level risk assessment indicated that the total risk from chemicals of potential concern [(COPCs) - OCPs] identified in soils was estimated to be 2 x 10-4, which presents an increased cancer risk of greater than 1 in 1,000,000 (>10-6). The total estimated health hazard index from COPCs identified in soils at the Site was estimated to be 2.2, which provides an increased health hazard (i.e., >1). Due to elevated concentrations of OCPs (specifically chlordane) identified in surface soil, the PEA recommended further action to reduce or eliminate the impact of these contaminants. The recommended remedial action was excavation, removal, and off-site disposal to an appropriately permitted landfill facility. DTSC concurred with the conclusion and recommendations, and approved the PEA Equivalent Report in a letter dated May 24, 2016.

The purpose of the response action was to mitigate potential risk to human health and the environment by the excavation and off-site disposal of soil containing concentrations of OCPs exceeding the DTSC-modified screening levels. A screening-level human health risk assessment was conducted using the unrestricted land-use scenario. DTSC approved the RAW for implementation on June 1, 2016. The RAW activities focused on excavating approximately 3,000 cubic yards (CY) or approximately 200 truckloads of soil contaminated with OCPs. Removal action field activities began on February 21, 2018 and were completed on July 30, 2018. The excavated soil was temporarily stockpiled on-site and characterized for waste disposal. All of the excavated soils, approximately 4,275 tons (or 3,050 cy), were classified as a non-hazardous solid waste and transported to the Recology Hay Road Landfill located in Visalia, California for disposal. Confirmation soil samples were collected from the bottom and side walls of the excavation areas and were chemically analyzed for chlordane.

On Jan 30, 2019, the removal action certification document was approved by the PM, Northern Cal Schools Unit Sup, and the Branch Chief. No further action is recommended.

SITE HISTORY:

The West Sac Rivers, LLC (Developer) plans to transfer ownership of the approximately 7-acre proposed new public charter elementary school property to the charter school following completion of the response action and site certification. The proposed new public charter elementary school property is identified by the Yolo County Assessor Office as Assessor's Parcel Numbers 014-630-06 (approximately 3.59 acres) and 014-760-28 (approximately 3.4 acres of a larger parcel), located at the northwest corner of Lighthouse Drive and Fountain Drive, West Sacramento, Yolo County, California (Site). The proposed new public charter elementary school will be designed to accommodate 196 students in five classrooms. Potable water and sewer services will

be provided to the Site by the City of West Sacramento municipality.

In October 2005, the Washington Unified School District (District) entered into an Environmental Oversight Agreement (EOA) with DTSC for oversight of environmental investigation activities associated with a larger 12-acre site proposed for a K–8 Fundamental Academy school. Under the EOA, a PEA Workplan (Geocon Consultants, Inc., January 11, 2006) was approved by DTSC on January 30, 2006. However, at the request of the District, the project was dropped on April 17, 2006. On November 23, 2015, the Developer requested reactivation of the project and submitted a completed Voluntary Cleanup Agreement application for a proposed new charter school. Based on the application, the boundaries of the Site have been reduced to include 7-acres of the originally proposed 12-acre K–8 Fundamental Academy school site. In addition, the proponent for the project has changed from the District to the Developer. The project name has changed from the "Proposed K-8 Fundamental Academy" to "The Rivers Phase II Proposed School".

Documents created for this project include:

• Phase I Environmental Site Assessment, Lighthouse Golf Course and Country Club (Kleinfelder, Inc., January 17, 2003);
• Phase I Environmental Site Assessment, Supplement No. 1, Three additional parcels and receipt of additional information, Lighthouse Development (Kleinfelder, Inc., March 13, 2003);
• Proposed K-8 School Facility at the Rivers, Fountain and Lighthouse Drives, West Sacramento, California, Limited Soil Sampling Summary Report (Geocon, Inc., May 10, 2005);
• Revised Workplan for Preliminary Endangerment Assessment, Proposed K-8 School Facility at the Rivers, Fountain and Lighthouse Drives (Geocon, Inc., January 2006);
• Phase I Environmental Site Assessment, West Riverview: Waldorf School Site (Wallace-Kuhl Associates, November 6, 2008);
• Soil Sampling and Analytical Testing (Engeo Incorporated, 2014)
• Soil Sampling and Analytical Testing (Engeo Incorporated, 2015)
• Phase I Environmental Site Assessment Update, The Rivers Phase II Proposed School Site (Engeo Incorporated, March 25, 2016);
• Preliminary Endangerment Assessment Equivalent Report (Engeo Incorporated, March 30, 2016);
• Removal Action Workplan, The Rivers Phase II Proposed School (Engeo Incorporated, September 20, 2016)
• Removal Action Completion Report, The Rivers Phase II Proposed School (Engeo Incorporated, November 26, 2018)

Historically, the Site was used for agricultural purposes, including an orchard pre-1940s and a pasture (hay, and/or small grain production) in the 1940s to 1960s. In 1963, the Yolo County Housing Authority constructed 13 housing units on the southern portion of the Site. This area reportedly received 2 to 9 feet of fill material (likely dredged river sediments from the Sacramento River) prior to 1963. The housing units were demolished in 2001. An ephemeral drainage separates the former Lighthouse Golf and Country Club and the Site. The Site is currently vacant with remnant asphalt paving remaining in the area of the former housing and parking areas.

The Site is bordered to the north by the former Lighthouse Golf and Country Club followed by single family residential subdivisions and the Sacramento River; to the east by Fountain Drive followed by vacant land, Levee Road, Yolo Park and the Sacramento River; to the south by Lighthouse Drive followed by single family residential subdivisions; and to the west by Riverbend Country Club Apartments.

From 2003 through 2016 the Site was investigated for the following recognized environmental conditions that may pose a threat to human health and/or the environment:

• OCPs and arsenic in soil from historic agricultural use;
• lead in soil from weathering of lead-based paint used from historic on-site structures; and termiticides in soil from historic structures;
• Petroleum hydrocarbons and related volatile organic compounds in the area of a former underground storage tank; and,
• polychlorinated biphenyls, OCPs, and metals to assess fill material.

The results of the PEA screening level risk assessment indicated that the total risk from chemicals of potential concern [(COPCs) - OCPs] identified in soils was estimated to be 2 x 10-4, which presents an increased cancer risk of greater than 1 in 1,000,000 (>10-6). The total estimated health hazard index from COPCs identified in soils at the Site was estimated to be 2.2, which provides an increased health hazard (i.e., >1). Due to elevated concentrations of OCPs (specifically chlordane) identified in surface soil, the PEA recommended further action to reduce or eliminate the impact of these contaminants. The recommended remedial action was excavation, removal, and off-site disposal to an appropriately permitted landfill facility. DTSC concurred with the conclusion and recommendations, and approved the PEA Equivalent Report in a letter dated May 24, 2016.

The purpose of the response action was to mitigate potential risk to human health and the environment by the excavation and off-site disposal of soil containing concentrations of OCPs exceeding the DTSC-modified screening levels. A screening-level human health risk assessment was conducted using the unrestricted land-use scenario. DTSC approved the RAW for implementation on June 1, 2016. The RAW activities focused on excavating approximately 3,000 cubic yards (CY) or approximately 200 truckloads of soil contaminated with OCPs. Removal action field activities began on February 21, 2018 and were completed on July 30, 2018. The excavated soil was temporarily stockpiled on-site and characterized for waste disposal. All of the excavated soils, approximately 4,275 tons (or 3,050 cy), were classified as a non-hazardous solid waste and transported to the Recology Hay Road Landfill located in Visalia, California for disposal. Confirmation soil samples were collected from the bottom and side walls of the excavation areas and were chemically analyzed for chlordane.

On Jan 30, 2019, the removal action certification document was approved by the PM, Northern Cal Schools Unit Sup, and the Branch Chief. No further action is recommended.

Cleanup Status: NO FURTHER ACTION AS OF 1/18/2017
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY
School District:
Past Use that Caused Contam: RAIL ROAD MAINTENANCE SHOP
Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER)
Potential Contamin of Concern:

UNDER INVESTIGATION

Site History:

DTSC has oversight over the cleanup of the groundwater plume that extends downtown from the UP, Downtown Sac Railyards. The tower project is above the plume, and there was a concern for the potential exacerbation of the plume due to dewatering activities. DTSC will review documents under a Standard Agreement with the owner.

Description of Events: LEAK WAS DISCOVERED DURING ULOADING PROCESS. INVESTIGATION REVEALED THAT AN ORDER OF METAL PLATES SHIFTED IN TRANSIT AND RUBBED AGAINST THE PALLET OF HAZMAT. HAZMAT ONE WAS CALLED AND AND A CERTIFIED EMERGENCY RESPONSE TEAM RESPONDED TO COMPLETE THE CLENAUP. SHIPPER WILL SEND REPLACEMENT CARTONS AND THE BALANCE OF THE SHIPMENT WAS SENT TO THE CONSIGNEE. CONSIGNEE HAS BEEN INFORMED OF THE SITUATION AND HAS AGREED TO ACCEPT THE RECOUPED PRODUCT.

Recommend Actions Taken: A PIECE OF PLYWOOD SHOULD HAVE BEEN PLACED BETWEEN THE HAZMAT AND THE METAL PLATING SO THAT IF IT DID SHIFT AND RUB IT WOULD ONLY BE TOUCHING PLYWOOD.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Oct 26, 2023

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Oct 26, 2023

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Oct 26, 2023

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Sep 19, 2023

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Sep 19, 2023

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Oct 2, 2023

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Oct 2, 2023

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Oct 2, 2023

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Oct 2, 2023

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Oct 2, 2023

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Oct 2, 2023

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Oct 2, 2023

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Oct 26, 2023

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Oct 26, 2023

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Oct 26, 2023

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Aug 12, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Mar 13, 2023

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: May 2, 2023

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: May 2, 2023

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Sep 20, 2023

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from the Federal Communications Commission Data hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Sep 22, 2023

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Sep 19, 2023

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Sep 19, 2023

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Oct 23, 2023

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Oct 23, 2023

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Oct 23, 2023

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Aug 10, 2023

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database: WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Oct 23, 2023

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 16, 2023

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 16, 2023

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 19, 2023

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jul 13, 2023

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jul 13, 2023

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Sep 18, 2023

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Nov 22, 2023

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

This listing includes Proposed Closure of Underground Storage Tank (UST) Cases which are being considered for closure by either the State Water Resources Control Board at a Future Board Meeting or the Executive Director that have been posted for a 60-day public comment period, and Closure of UST Cases with Closure Denials and Approved Orders. The lists are provided by the California Water Boards.

Government Publication Date: Sep 18, 2023

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Oct 13, 2023

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Nov 27, 2023

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Oct 16, 2023

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Oct 16, 2023

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Oct 23, 2023

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jul 13, 2023

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Oct 23, 2023

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jul 13, 2023

Delisted Cleanup Program Sites: DELISTED CLEANUP

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.
Government Publication Date: Jul 13, 2023

Delisted County Records: DELISTED COUNTY
Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.
Government Publication Date: Dec 20, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST
This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST
This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST
Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 26, 2023

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST
Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 26, 2023

County

Sacramento County - Toxic Site Cleanup List: TOX SACRMNTO
Sacramento County Environmental Management Department (EMD)'s Toxic Site Cleanup List includes sites where unauthorized releases of potentially hazardous materials have occurred. The EMD's Site Assessment & Mitigation Program, also referred to as Toxic Site Cleanup Program, provides mandated regulatory oversight of the assessment and remediation of properties on which there has been a release of hazardous materials to soil and/or groundwater.
Government Publication Date: Mar 30, 2021

Sacramento County - Master Hazardous Materials Facility List: HAZ SACRMNTO
A list of Hazardous Materials Facilities in Sacramento County. This list is made available by Sacramento County Environmental Management Department which has been designated as the Certified Unified Program Agency (CUPA) for the County.
Government Publication Date: Nov 7, 2022

Yolo County Leaking Storage Tanks: LUST YOLO
This list of Leaking Underground Storage Tanks in Yolo County is maintained by the Yolo County Environmental Health Division and the Central Valley Regional Water Quality Control Board. Data from April 2008 was maintained by Yolo County Environmental Health Department and is still available for review, but leaky storage tanks have since been transferred to the State Water Resources Control Board's GeoTracker database system.
Government Publication Date: Apr 16, 2008

Yolo County - UST List: UST YOLO
A list of registered Underground Storage Tank (UST) sites in Yolo County. This list is made available by Yolo County Environmental Health Department which regulates the construction, operation, repair and removal of USTs throughout Yolo County.
Government Publication Date: Mar 3, 2023

Yolo County - AST List: AST YOLO

A list of registered Aboveground Storage Tank (AST) in Yolo County. This list is made available by Yolo County Department of Community Services, Division of Environmental Health.

Government Publication Date: Dec 21, 2022

Yolo County - CUPA List: CUPA YOLO

The Department of Community Services, Division of Environmental Health of Yolo County maintains a list of Certified Unified Program Agency (CUPA) facilities.

Government Publication Date: Dec 21, 2022

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Sep 8, 2023

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Dec 18, 2023

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to September 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Sep 5, 2023

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Oct 9, 2022

National Response Center PFAS Spills: ERNS PFAS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Sep 23, 2023

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Nov 27, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Oct 11, 2023

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Jul 3, 2023

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: Mar 6, 2023

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Jul 26, 2023

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Oct 26, 2023

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Jan 21, 2023

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jul 23, 2023

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Jul 23, 2023

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: Nov 6, 2023

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: May 1, 2023

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into eAMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: Jun 13, 2023

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 30, 2023

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2023

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Oct 30, 2023

State

PFAS Sampling Locations: PFAS SAMPLING

This data is sourced from the State Water Board's GeoTracker Per- and Polyfluoroalkyl Substances (PFAS) Map tool which contains individual sampling points (i.e., soil boring, groundwater monitoring well, drinking water well for municipal drinking water systems, etc.) or a site location with PFAS analytical data. Includes analytical results that are finalized and submitted electronically by the Responsible Parties via GeoTracker's Electronic Submittal of Information Portal, and after it's accepted by a Regional Water Quality Control Board.

Government Publication Date: Sep 25, 2023

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jan 31, 2022

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Jan 31, 2022

PFAS GeoTracker Cleanup Sites: PFAS GT CLEANUPS

A list of applicable cleanup sites from the State Water Resources Control Board's (SWRCB) GeoTracker data management system where one or more of the potential contaminants of concern are identified in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jul 13, 2023

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2023

PFAS Investigations: PFAS INVEST

This list of potential Per- and Polyfluoroalkyl Substance (PFAS) sites is compiled from the California State Water Resources Control Board's (SWRCB) PFAS Investigations Map tool. The SWRCB issued investigative orders, per California Water Code (CWC) Section 13267 and/or 13383, to these sites. This does not mean that PFAS has been produced, used, or discharged at these sites. Orders were also issued to the public water systems to sample wells in the vicinity of these locations. The data includes locations for airports, landfills, suspected chrome plating facilities, publicly owned treatment works (aka wastewater treatment plants), bulk fuel terminals, refineries, and military facilities that have potential sources of PFAS.

Government Publication Date: Nov 28, 2022

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Mar 15, 2023

Toxic Pit Cleanup Act Sites: TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is not longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked by the California Department of Toxic Substance Control's (DTSC) EnviroStor data management system.

Government Publication Date: Jul 28, 2023

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Oct 23, 2023

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jul 26, 2023

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Handlers from Hazardous Waste Manifest Data: HAZNET

A list of handlers not otherwise classified as Treatment, Storage, Disposal facilities (TSDF) or generators from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Oct 24, 2016

Generators from Hazardous Waste Manifest Data: HAZ GEN

List of handlers listed as having generated waste from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

TSDF from Hazardous Waste Manifest Data: HAZ TSD

List of Treatment, Storage, and Disposal Facilities (TSDFs) from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Sep 28, 2023

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Aug 29, 2023

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Oct 4, 2023

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Oct 16, 2023

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jul 13, 2023

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jun 16, 2023

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Sep 15, 2023

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jul 13, 2023

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2020

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Soil Information....11
Wells and Additional Sources....16
Summary....17
Detail Report....39
Radon Information....537
Appendix....538
Liability Notice....540

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Hydrologic Information

FEMA Flood Zone Definitions

Special Flood Hazard Areas – High Risk

Special Flood Hazard Areas represent the area subject to inundation by 1-percent-annual chance flood. Structures located within the SFHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory flood insurance purchase requirements apply in these zones.

ZONE	DESCRIPTION
A	Areas subject to inundation by the 1-percent-annual-chance flood event. Because detailed hydraulic analyses have not been performed, no Base Flood Elevations (BFEs) or flood depths are shown.
AE, A1-A30	Areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods. BFEs are shown within these zones. (Zone AE is used on new and revised maps in place of Zones A1–A30.)
AH	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are 1–3 feet. BFEs derived from detailed hydraulic analyses are shown in this zone.
AO	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are 1–3 feet. Average flood depths derived from detailed hydraulic analyses are shown within this zone.
AR	Areas that result from the decertification of a previously accredited flood protection system that is determined to be in the process of being restored to provide base flood protection.
A99	Areas subject to inundation by the 1-percent-annual-chance flood event, but which will ultimately be protected upon completion of an under-construction Federal flood protection system. These are areas of special flood hazard where enough progress has been made on the construction of a protection system, such as dikes, dams, and levees, to consider it complete for insurance rating purposes. Zone A99 may be used only when the flood protection system has reached specified statutory progress toward completion. No BFEs or flood depths are shown.

Coastal High Hazard Areas – High Risk

Coastal High Hazard Areas (CHHA) represent the area subject to inundation by 1-percent-annual chance flood, extending from offshore to the inland limit of a primary front al dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. Structures located within the CHHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory purchase requirements apply in these zones.

ZONE	DESCRIPTION
V	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards associated with storm-induced waves. Because detailed coastal analyses have not been performed, no BFEs or flood depths are shown.
VE, V1-V30	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards due to storm-induced velocity wave action. BFEs derived from detailed hydraulic coastal analyses are shown within these zones. (Zone VE is used on new and revised maps in place of Zones V1–V30.)

Hydrologic Information

Moderate and Minimal Risk Areas

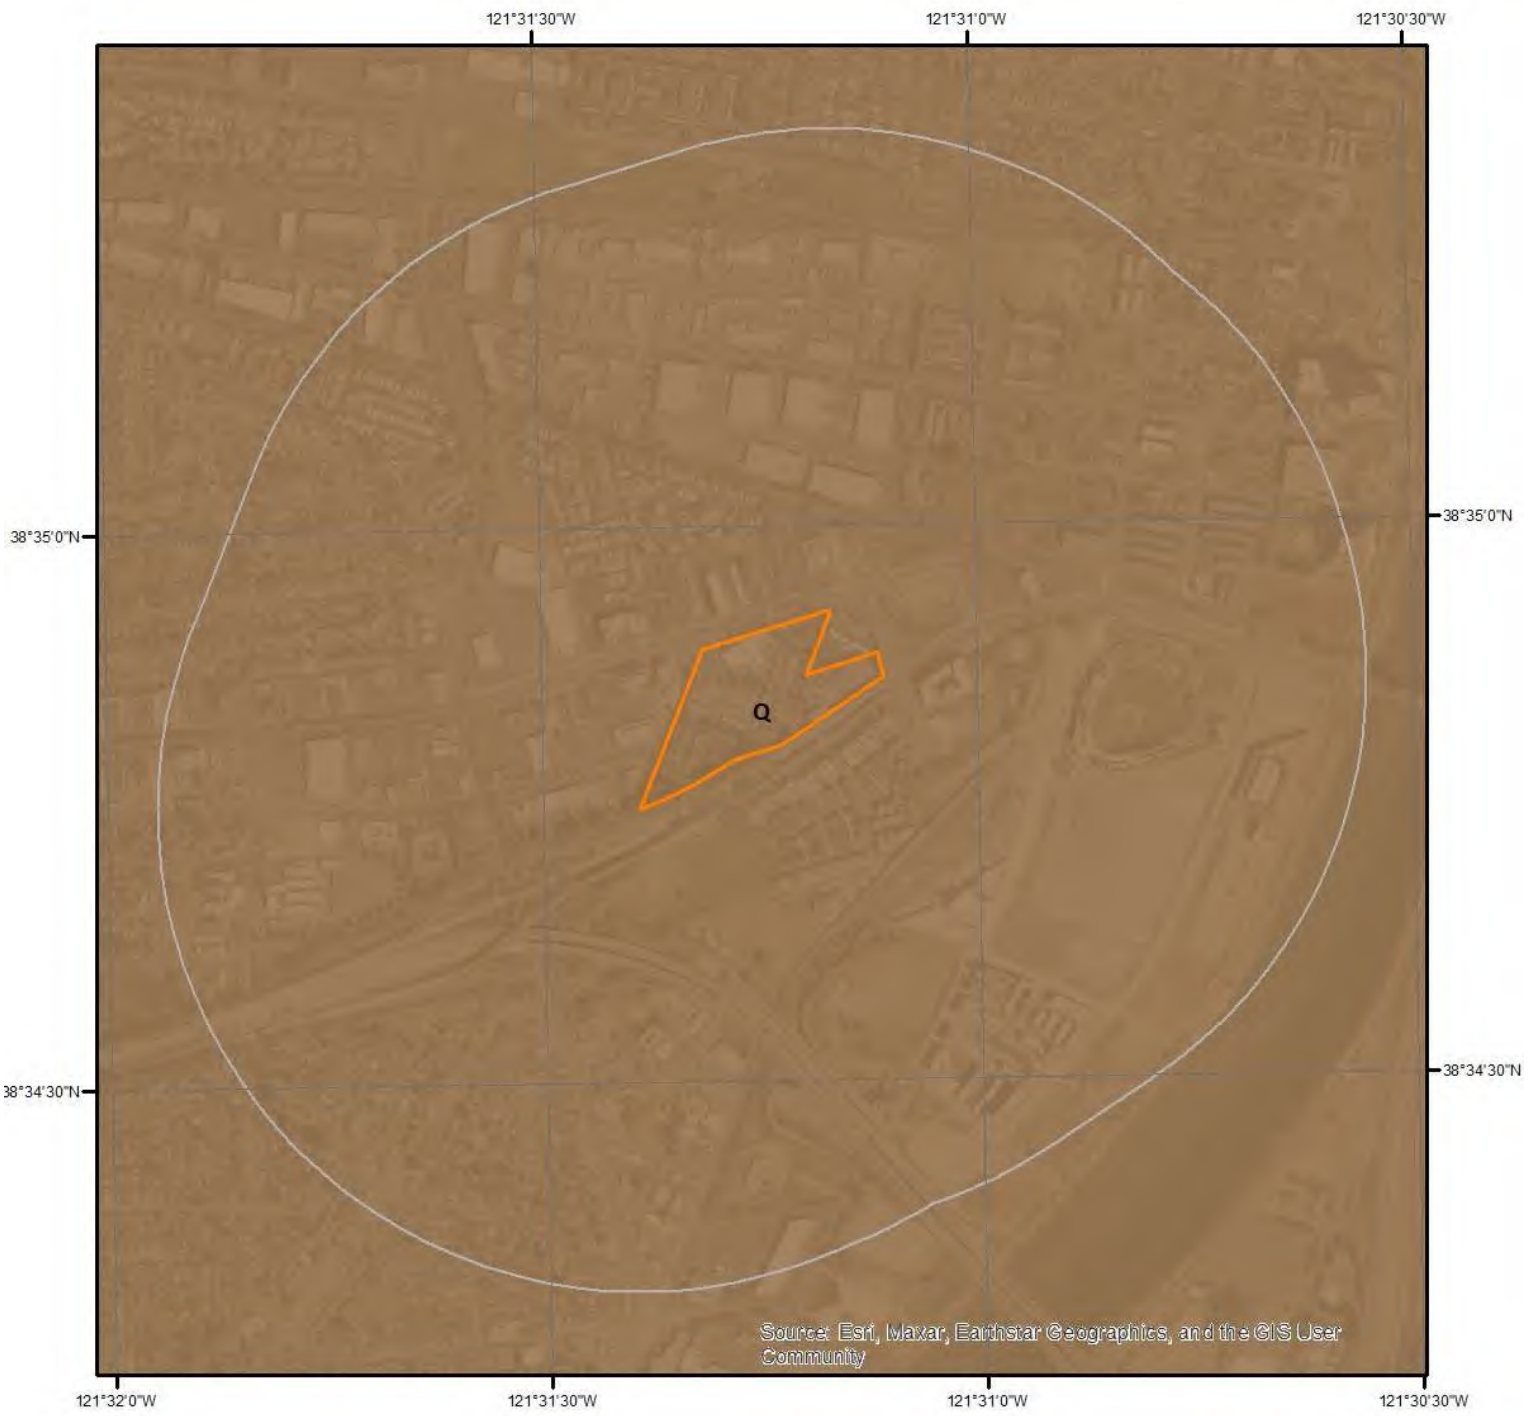
Areas of moderate or minimal hazard are studied based upon the principal source of flood in the area. However, buildings in these zones could be flooded by severe, concentrated rainfall coupled with inadequate local drainage systems. Local stormwater drainage systems are not normally considered in a community's flood insurance study. The failure of a local drainage system can create areas of high flood risk within these zones. Flood insurance is available in participating communities, but is not required by regulation in these zones. Nearly 25-percent of all flood claims filed are for structures located within these zones.

ZONE	DESCRIPTION
B, X (shaded)	Moderate risk areas within the 0.2-percent-annual-chance floodplain, areas of 1-percent-annual-chance flooding where average depths are less than 1 foot, areas of 1-percent-annual-chance flooding where the contributing drainage area is less than 1 square mile, and areas protected from the 1-percent-annual-chance flood by a levee. No BFEs or base flood depths are shown within these zones. (Zone X (shaded) is used on new and revised maps in place of Zone B.)
C, X (unshaded)	Minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains. No BFEs or base flood depths are shown within these zones. (Zone X (unshaded) is used on new and revised maps in place of Zone C.)

Undetermined Risk Areas

ZONE	DESCRIPTION
D	Unstudied areas where flood hazards are undetermined, but flooding is possible. No mandatory flood insurance purchase requirements apply, but coverage is available in participating communities.

Geologic Information



Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit La (18.15%)

Map Unit Name:	Lang sandy loam
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	91cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.

Major components are printed below

Lang(85%)

horizon H1(0cm to 15cm)	Sandy loam
horizon H2(15cm to 119cm)	Stratified sand to loamy fine sand
horizon H3(119cm to 216cm)	Stratified sand to silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: La - Lang sandy loam

Component: Lang (85%)
The Lang component makes up 85 percent of the map unit. Slopes are 0 to 1 percent. This component is on alluvial fans. The parent material consists of mixed alluvium. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is rarely flooded. It is not ponded. A seasonal zone of water saturation is at 36 inches during January, February, March, November, December. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 2e. This soil does not meet hydric criteria.

Component: Tyndall (5%)
Generated brief soil descriptions are created for major soil components. The Tyndall soil is a minor component.

Component: Valdez (4%)
Generated brief soil descriptions are created for major soil components. The Valdez soil is a minor component.

Component: Sycamore (4%)
Generated brief soil descriptions are created for major soil components. The Sycamore soil is a minor component.

Component: Unnamed (2%)
Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Map Unit Lb (10.01%)

Map Unit Name:	Lang sandy loam, deep
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	91cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.

Major components are printed below

Lang(85%)

horizon H1(0cm to 15cm)	Sandy loam
horizon H2(15cm to 119cm)	Stratified sand to loamy fine sand

horizon H3(119cm to 216cm)	Stratified silty clay loam to clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Lb - Lang sandy loam, deep

Component: Lang (85%)
The Lang component makes up 85 percent of the map unit. Slopes are 0 to 1 percent. This component is on alluvial fans. The parent material consists of mixed alluvium. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is rarely flooded. It is not ponded. A seasonal zone of water saturation is at 36 inches during January, February, March, November, December. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4w. Irrigated land capability classification is 3w. This soil does not meet hydric criteria.

Component: Tyndall (5%)
Generated brief soil descriptions are created for major soil components. The Tyndall soil is a minor component.

Component: Sycamore (4%)
Generated brief soil descriptions are created for major soil components. The Sycamore soil is a minor component.

Component: Valdez (4%)
Generated brief soil descriptions are created for major soil components. The Valdez soil is a minor component.

Component: Unnamed (2%)
Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Map Unit Ld (3.18%)

Map Unit Name:	Lang silt loam
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	91cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Lang(85%)

horizon H1(0cm to 15cm)	Silt loam
horizon H2(15cm to 119cm)	Stratified sand to loamy fine sand
horizon H3(119cm to 216cm)	Stratified silty clay loam to clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Ld - Lang silt loam

Component: Lang (85%)
The Lang component makes up 85 percent of the map unit. Slopes are 0 to 1 percent. This component is on alluvial fans. The parent material consists of mixed alluvium. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is rarely flooded. It is not ponded. A seasonal zone of water saturation is at 36 inches during January, February, March, December. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4w. Irrigated land capability classification is 3w. This soil does not meet hydric criteria.

Component: Tyndall (7%)
Generated brief soil descriptions are created for major soil components. The Tyndall soil is a minor component.

Component: Valdez (5%)
Generated brief soil descriptions are created for major soil components. The Valdez soil is a minor component.

Soil Information

Component: Unnamed (3%)
Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Map Unit So (1.43%)

Map Unit Name:	Sycamore silt loam, 0 to 1 percent slopes, MLRA 17
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	125cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Sycamore(85%)

horizon Ap(0cm to 10cm)	Silt loam
horizon A(10cm to 36cm)	Silt loam
horizon Bw(36cm to 66cm)	Silt loam
horizon Bwk(66cm to 112cm)	Silt loam
horizon C(112cm to 152cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: So - Sycamore silt loam, 0 to 1 percent slopes, MLRA 17

Component: Sycamore (85%)
The Sycamore component makes up 85 percent of the map unit. Slopes are 0 to 1 percent. This component is on natural levees on valleys, flood-plain splays on valleys. The parent material consists of alluvium derived from igneous, metamorphic and sedimentary rock. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is low. This soil is occasionally flooded. It is not ponded. A seasonal zone of water saturation is at 49 inches during January, February. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 4w. Irrigated land capability classification is 2w. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 1 percent. There are no saline horizons within 30 inches of the soil surface.

Component: Maria (4%)
Generated brief soil descriptions are created for major soil components. The Maria soil is a minor component.

Component: Merritt (4%)
Generated brief soil descriptions are created for major soil components. The Merritt soil is a minor component.

Component: Tyndall (4%)
Generated brief soil descriptions are created for major soil components. The Tyndall soil is a minor component.

Component: Yolo (3%)
Generated brief soil descriptions are created for major soil components. The Yolo soil is a minor component.

Map Unit Vb (7.55%)

Map Unit Name:	Valdez silt loam, clay substratum, partially drained, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	91cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Valdez(85%)

horizon Ap(0cm to 36cm)	Silt loam

horizon C1(36cm to 53cm)	Very fine sandy loam
horizon C2(53cm to 102cm)	Silt loam
horizon 2C3(102cm to 200cm)	Clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Vb - Valdez silt loam, clay substratum, partially drained, 0 to 2 percent slopes

Component: Valdez (85%)
The Valdez, clay substratum component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on deltas on delta plains. The parent material consists of fine-silty alluvium derived from igneous, metamorphic and sedimentary rock over clayey alluvium derived from igneous, metamorphic and sedimentary rock. Depth to a root restrictive layer, abrupt textural change, inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is rarely flooded. It is not ponded. A seasonal zone of water saturation is at 36 inches during January, February, March, April, November, December. Organic matter content in the surface horizon is about 1 percent. This component is in the R016XA001CA Tidally-influenced, Freshwater Sites (provisional) ecological site. Nonirrigated land capability classification is 4w. Irrigated land capability classification is 3w. This soil meets hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 3 within 30 inches of the soil surface.

Component: Tyndall (3%)
Generated brief soil descriptions are created for major soil components. The Tyndall soil is a minor component.

Component: Maria (3%)
Generated brief soil descriptions are created for major soil components. The Maria soil is a minor component.

Component: Sacramento (3%)
Generated brief soil descriptions are created for major soil components. The Sacramento soil is a minor component.

Component: Sycamore (2%)
Generated brief soil descriptions are created for major soil components. The Sycamore soil is a minor component.

Component: Lang (2%)
Generated brief soil descriptions are created for major soil components. The Lang soil is a minor component.

Component: Laugenour (2%)
Generated brief soil descriptions are created for major soil components. The Laugenour soil is a minor component.

Map Unit W (59.67%)

Map Unit Name: Water

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: W - Water

Component: Water (100%)
Generated brief soil descriptions are created for major soil components. The Water is a miscellaneous area.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *YOLO* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *YOLO* County

No Measures/Homes:	14
Geometric Mean:	0.8
Arithmetic Mean:	1.4
Median:	1.2
Standard Deviation:	1.5
Maximum:	5.8
% >4 pCi/L:	7
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Appendix

Oil and Gas Wells **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

APPENDIX D: QUALIFICATIONS

PARTNER

Alexandria Miranda
Project Scientist

Education

Bachelor's Degree, Geology
Minor, English
California State University Sacramento, Sacramento, CA

Highlights

Phase I Environmental
Site Assessments
Transaction Screen Assessments
Environmental Desktop Reports

Experience Summary

Ms. Alexandria Miranda currently serves as a Staff Scientist for Partner Engineering and Science, Inc. and is located out of the Roseville, California office. Ms. Miranda's responsibilities include performing site assessments, public record research, as well as technical report writing in line with the American Science of Testing and Materials (ASTM) standards for residential, agricultural, industrial, and commercial properties. These assessments include collaboration with state and local regulatory agencies to obtain pertinent information regarding potential environmental concerns.

Ms. Miranda has conducted assessments for sites including, but not limited to, industrial/warehouse facilities, office buildings, multi-tenant retail buildings, multi-family residential buildings, current and prior gas stations, pre-demolition properties, and hospitality facilities through the state of California.

Ms. Miranda has performed services for various financial institutions including US Bank, Mechanics Bank, and Umpqua Bank.

Project Experience

The following are selected summarized examples of Ms. Miranda's due diligence experience:

Atlantic Plaza-ATM, Pittsburg, California. Ms. Alexandria performed a Phase I Environmental Site Assessment for a 0.3-acre portion of a commercial parking lot.

Industrial property, North Highlands, California. Ms. Alexandria assisted on a Phase I Environmental Site Assessment for a 5.0-acre industrial building used for the production and distribution of wood products with former USTs.

Multi-building industrial property, Sacramento, California. Ms. Alexandria performed a Phase I Environmental Site Assessment for a 3.0-acre multi-building industrial property used for fabrication of metal products.

Commercial building, San Rafael, California. Ms. Alexandria performed a Phase I Environmental Site Assessment for a 0.3-acre commercial property.

PARTNER

Joel Redding
Senior Project Manager

Education
B.A. Geography, California State University Fresno

Training
OSHA 24-Hour Health and Safety Training

Highlights
16 years of experience in environmental consulting
Phase I Environmental Site Assessments (ESAs)
Environmental Transaction Screens
Desktop Reviews

Experience Summary
Mr. Redding serves as a Senior Project Manager for Partner Engineering and Science, Inc. (Partner), overseeing and managing all aspects of multi-scope projects including Phase I ESAs in accordance with EPA's All Appropriate Inquiry (AAI), Property Condition Assessments (PCAs), Zoning Reports, and Seismic Assessments.

Mr. Redding has over sixteen years of project experience in the environmental consulting industry. Mr. Redding is familiar with all aspects of Due Diligence Property Assessments and the needs and requirements of a varied number of reporting standards, including ASTM E1527-13, EPA's All Appropriate Inquiry (AAI), The U.S. Small Business Administration (SBA), and customized client formats and scopes. Mr. Redding has performed and supervised over 1,000 ESAs and customized environmental assessments of a variety of properties including multi-family residential, hospitality, commercial office buildings, shopping centers, multi-tenant commercial complexes, industrial warehouses, manufacturing facilities, dry cleaning plants, gasoline service stations, automotive repair and body shops, medical facilities, food processing facilities, and agricultural properties.

Project Experience
Junior College Campus and Historical Military and Medical Hospital, Modesto, CA. Mr. Redding prepared a Phase I ESA on a junior college campus in Modesto, the site of a historical World War II era military hospital and subsequent State-run hospital. Multiple recognized environmental conditions (RECs) were identified related to current and historical uses including vehicle and facilities maintenance, underground and aboveground fueling facilities, domestic wastewater treatment systems and septic systems, and asbestos and lead-based paint issues.

2,500-Acre Agricultural Property, Maricopa, CA. Mr. Redding prepared a Phase I ESA on a large agricultural property within an active oil and gas production area. Multiple RECs were identified related to oil and gas well development, oil and gas production, subsurface oil and gas pipelines, aboveground fuel storage, and agricultural chemical use, storage, and application.

Printed Circuit Board Manufacturing Facility, Redwood City, CA. Mr. Redding prepared a Phase I ESA on a printed circuit board manufacturing facility. Multiple RECs were identified related to electroplating, etching, silk screening, chemical storage, and hazardous waste generation, storage, and treatment operations.

10-Site Residential Portfolio, Central CA. Managed a multi-million dollar acquisition project consisting of Phase ESAs of ten, large-acreage, rural agricultural properties throughout Central California for a residential developer. Duties included managing, performing, and reviewing Phase I ESAs.

25-Site Grocery Chain Portfolio, OR and CA. Managed a multi-million dollar rehabilitation financing project consisting of Phase I ESAs of 25 grocery store properties throughout the State of Oregon and Northern California. Duties included managing, performing, and reviewing Phase I ESAs.

50-Site Mobile Home Park Portfolio, MI, OH, IN, and AL. Managed a multi-million dollar acquisition project consisting of 50 mobile home parks in Michigan, Ohio, Indiana, and Alabama. Duties included managing and reviewing Phase I ESAs.

Highlights

5 years in construction management
15 years in commercial real estate
19 years' experience in customer service

Experience Summary

Mr. Sims is a Relationship Manager with Partner Engineering and Science, Inc. In this role he will focus on due diligence services for commercial real estate clients including quick serve chain restaurants, industrial, and developers. His responsibilities include full-phase site development and environmental consulting, national client management, multi-scope contract negotiation/execution, portfolio project management, and technical report quality control.

Mr. Sims is versed in the construction cycle from design, planning, sub-trades, site logistics, field coordination, building regulation, and project schedule for new retail shopping malls and mixed-use developments. He has managed $40M, or 700,000 square feet of new development in northern California. He is intimately familiar with the multidisciplinary engineering and environmental services required by architects, developers, builders, engineers, subcontractors, municipalities, and other stakeholders. Mr. Sims also has more than a decade of experience in custom relationship management where he oversaw the day-to-day operations of a large construction supply retail business.

His responsibilities include site development and environmental consulting, regional client management, multi-scope contract negotiation/execution, project management, and technical report quality control. His regional expertise compliments the wide variety of Partner projects and client types including retail developers, mixed-use developers, asset management/investment groups, and commercial real estate professionals.
